Chung Yue Steel Group Ltd. (CY Steel) collects and recycles scrap metal, including initial sorting, shearing, shredding, and then selling as processed scrap metal products with added value.

CY Steel aims to conserve limited and exhaustible resources, save energy, realize environmental friendliness, create job opportunities and minimize waste disposal. The company's innovative recycling system can produce higher "purity", finer and less bulky scrap metal products, turning waste into valuable inputs for steel refinery smelting furnaces.

In the long term, CY Steel will thrive to process large quantity of scrap metal; as a tenant, to optimize the usage of this land by maximizing the processed scrap per square meter. Understanding recycling as a collaborative function that can only be achieved with large joint effort, with support from EcoPark, CY Steel will collaborate with other tenants to bring the synergy of EcoPark to fruition. Recycling is not only our business; it is our passion and profession.
