EXECUTIVE SUMMARY

General

EcoPark is a key element in the Government's waste management policy that aims to promote the local recycling industry and jump-start a circular economy to provide a sustainable solution to our waste problems.

EcoPark has been developed in two phases (Phase 1 and Phase 2) under construction contract EP/SP/52/06 Development of EcoPark in Tuen Mun Area 38, which was awarded to Kaden Construction by the Environmental Protection Department (EPD) in June 2006. Phase 1 construction was completed in July 2009 and Phase 2 construction was completed in November 2010. The seven-year contract for the operation of EcoPark EP/SP/53/06 Provision of Management Services for EcoPark in Tuen Mun Area 38 was awarded to Serco Guardian Joint Venture (SGJV) by EPD in November 2006.

Effective from August 2010 onwards, SGJV ("the Operator") has appointed SMEC Asia Ltd (SMEC) as the Environmental Team (ET) for the Environmental Monitoring and Audit (EM&A) works, replacing the previous ET who were engaged by SGJV from May 2007 to July 2010. Effective from January 2011 onwards, SGJV has appointed Atkins China Ltd (Atkins) as the Independent Environmental Checker (IEC) for the EM&A works, replacing the previous IEC who were engaged by EPD from May 2007 to December 2010. The ET and the IEC carry out the EM&A works for EcoPark as required by the EM&A Manual and in accordance with the conditions of the Environmental Permit.

This is the fifteenth quarterly EM&A report prepared for the operation phase of EcoPark and covers November 2010 to January 2011.

The tenants' recycling activities are audited on a monthly basis and the results are summarised in this report. At present, there are eight tenants in EcoPark:

1. Phase 1
 - Champway Technology Limited (Champway) – waste cooking oil;
 - Shiu Wing Steel Limited (Shiu Wing) – waste metals;
 - Hong Kong Hung Wai Wooden Board Company (Hung Wai) – waste wood;
 - Li Tong Group (Li Tong) – Waste Electrical and Electronic Equipment (WEEE);
 - Hong Kong Telford Envirotech Group Limited (Telford) – waste plastics; and
 - Cosmos Star Holdings Co., Limited (Cosmos) – waste lead-acid batteries.
2. Phase 2
 - YOT EcoPark Plastic Resources Recycling Centre (Yan Oi Tong) – waste plastics; and
 - St. James' Settlement "WEEE GO GREEN" EcoPark (St James' Settlement) – WEEE.

The ET has conducted monthly site inspections, the IEC has carried out quarterly inspections, and some general observations have been made. The approved checklist has been used in the monthly site inspections for various tenants since October 2009.

Throughput of Materials / Waste Generated

As of end-January 2011, six tenants (Champway, Shiu Wing, Hung Wai, Li Tong, Yan Oi Tong and St. James' Settlement) have commenced recycling activities within their lots. Two tenants, Telford and Cosmos, have not commenced full recycling activities but were carrying out preparatory works within their lots, however Telford commenced trial commissioning on 4 November 2010. The following throughputs occurred during the reporting quarter:

1. **Champway.** 334,895kg of cooking oil and 293,750kg of grease-trap waste were delivered and processed, producing 520,968kg of treated cooking oil, 784,160kg of biodiesel and 23,524kg of glycerine. A total of 155,838kg of waste was generated, including 30,640kg of inorganic waste, 53,575kg of organic waste and 71,623kg of water waste (semi-solid and slurry inclusive).
2. **Shiu Wing.** 1,913,150kg of waste metal was delivered and processed, producing the same amount of sheared heavy ferrous scrap on site. No waste was generated.
3. **Hung Wai.** 888,830kg of waste wood was delivered and processed, resulting in 1,449,000kg of wood chips as product output. No waste was generated.
4. **Li Tong.** 77,339kg of WEEE was delivered and processed, producing 6,168kg of metals and 27,293kg of non-metals. 1,752kg of general refuse was generated.
5. **Telford.** Although formal recycling activities are not currently being carried out, 110,000kg of waste plastics were delivered. Telford commenced trial commissioning on 4 November 2010.
6. **Cosmos.** No recycling activities are being carried out and no waste has been delivered.
7. **Yan Oi Tong.** 264,601kg of waste plastics were delivered and 213,741kg were processed. 36,350kg of general refuse was generated from mixed waste plastics.
8. **St James' Settlement.** 58,763kg of WEEE was delivered and processed, producing 915 pieces of repaired / refurbished Electrical and Electronic Equipment (EEE), 16,065kg of metals and 7,522kg of non-metals. 2,925kg of general refuse was generated.

Exceedances of any Measured Action / Limit Levels

In terms of monitoring during operation phase EM&A, only quarterly monitoring of landfill gas (LFG) is required "following construction". Construction of Phase 1 was completed in July 2009, so LFG monitoring commenced in the next reporting quarter (August to October 2009). Construction of Phase 2 was completed in November 2010, so LFG monitoring commenced in the next reporting quarter (November 2010 to January 2011).

LFG monitoring during this quarter was undertaken on 17 January 2011 at five locations (three in Phase 1 and two in Phase 2). No exceedance of Action/Limit Level was recorded.

Summary of Complaints, Summons and Prosecutions

Numbers of complaints, summons and successful prosecutions are summarized below:

- Zero Complaints;
- Zero Summons; and
- Zero Successful Prosecutions.

Reporting Changes

Effective from January 2011, Atkins China Ltd (Atkins) have been engaged by SGJV as the Independent Environmental Checker (IEC) for the EM&A works, replacing the previous IEC who were engaged by EPD from May 2007 to December 2010. The nominated IEC from Atkins is Ms Sharifah OR.

Future Key Issues

By end of this reporting quarter, two tenants of Phase 1, Telford and Cosmos, had not commenced full recycling activities but were carrying out preparatory works within their lots. After commencing trial commissioning on 4 November 2010, Telford are expected to commence formal recycling activities in the first quarter of 2011.

In the next reporting quarter, operation phase LFG monitoring for Phase 1 and Phase 2 will continue.

1 PROJECT DESCRIPTION

1.1 Overview

In the document "A Policy Framework For The Management Of Municipal Solid Waste (2005-2014)" the government set out a comprehensive policy to support the recycling industry. This included allocating suitable land, encouraging research and development, introducing environmental legislation and providing effective support measures. To this end, EcoPark is a key element that aims to promote the local recycling industry and jump-start a circular economy to provide a sustainable solution to our waste problems. By encouraging and promoting the reuse, recovery and recycling of our waste resources and returning them to the consumption loop, EcoPark will help to realise the full potential of the local recycling industry and alleviate the heavy reliance on the export of recyclable materials recovered from Hong Kong.

EcoPark has been developed in Tuen Mun Area 38 (see **Figure 1-1**) in two phases (Phase 1 and Phase 2) under construction contract *EP/SP/52/06 Development of EcoPark in Tuen Mun Area 38*, which was awarded to Kaden Construction by the Environmental Protection Department (EPD) in June 2006. Phase 1 construction was completed in July 2009 and Phase 2 construction was completed in November 2010. The seven-year contract for the operation of EcoPark *EP/SP/53/06 Provision of Management Services for EcoPark in Tuen Mun Area 38* was awarded to Serco Guardian Joint Venture (SGJV) by EPD in November 2006.

Effective from August 2010 onwards, SGJV ("the Operator") has appointed SMEC Asia Ltd (SMEC) as the Environmental Team (ET) for the Environmental Monitoring and Audit (EM&A) works, replacing the previous ET who were engaged by SGJV from May 2007 to July 2010. Effective from January 2011 onwards, SGJV has appointed Atkins China Ltd (Atkins) as the Independent Environmental Checker (IEC) for the EM&A works, replacing the previous IEC who were engaged by EPD from May 2007 to December 2010. The ET and the IEC carry out the EM&A works for EcoPark as required by the EM&A Manual and in accordance with the conditions of the Environmental Permit.

1.2 Operation Programme

By end of January 2011, two tenants, Telford and Cosmos, had commenced preparatory works within their lots. Telford commenced trial commissioning on 4 November 2010. Six tenants (Champway, Shiu Wing, Hung Wai, Li Tong, Yan Oi Tong and St. James' Settlement) have started recycling activities.

Environmental observations noted during this quarter's site inspections are detailed in **Section 7**. In brief, these are as follows:

1. **Champway.** Produced a significant amount of biodiesel from waste cooking oil. By the end of January 2011, a small amount of biodiesel has been temporarily stored in the area reserved for the EcoPark wastewater treatment Plant (WWTP), next to Telford's lot. The key environmental concerns identified include uncovered oil bucket and oil stain on bare ground; as a result, Champway was reminded to place chemicals/ chemical wastes in proper containers with covers, remove the oil stain and dispose of it properly.
2. **Shiu Wing.** Sheared waste metal into heavy ferrous scrap, although the misting system and industrial dust collector are not yet in place. While the collection and disposal of Asbestos Containing Materials (ACM) shall be followed up in the next

monthly audit, debris and materials inside surface channels and oil leakage were recorded in Shiu Wing's lot in this reporting quarter. The tenant was therefore suggested to provide regular maintenance to surface channels and clean up the oil spillage by absorbent.

3. **Hung Wai.** Shredded large amount of waste wood into wooden chips. No critical environmental issues were observed and the lot was generally tidy.
4. **Li Tong.** Started checking and dismantling WEEE manually. No critical environmental issues were observed and the lot was generally tidy.
5. **Yan Oi Tong.** The key environmental concerns were wastewater overflow at the working area, stagnant water and refuse inside the gully gratings as well as housekeeping. The tenant was therefore reminded to improve housekeeping, clear the overflow and materials inside the gully regularly. The tenant was also suggested to consider the provision of covers to the surface channels.
6. **St. James' Settlement.** Commenced sorting and checking WEEE. Issues on the handling of unwanted refrigerant and potential LFG hazard were identified and rectified. Other key environmental concerns include refuse inside surface channels, unlabelled chemical waste containers and chemical waste storage, the tenant was thus reminded to provide regular maintenance to surface channels, label all chemical waste containers and place all chemical containers inside the area with secondary containment. Also the chemical waste storage areas should be locked when not in use.

Remedial actions were recommended to tenants, and the remedial status shall be followed up in the next monthly site inspection.

1.3 EM&A Organisation

The EM&A works are carried out by the ET and the IEC on behalf of the Operator for the Project Proponent. The key personnel contact details (effective January 2011) are summarised in **Table 1-1**.

2 SUMMARY OF EM&A REQUIREMENTS

2.1 Monitoring Parameters

In terms of monitoring during operation phase EM&A, only quarterly monitoring of landfill gas (LFG) is required at service voids and utility boxes “following construction”. This is because part of EcoPark lies within the 250m “LFG consultation zone” for Siu Lang Shui Landfill, which is located to the north of EcoPark.

Construction of Phase 1 was completed in July 2009, so LFG monitoring commenced in the next reporting quarter (August to October 2009). Construction of Phase 2 was completed in November 2010, so LFG monitoring commenced in the next reporting quarter (November 2010 to January 2011).

The location for LFG monitoring was not specified in the EM&A Manual since the final design of EcoPark had not been completed when the EM&A Manual was approved. Therefore, during the joint site inspection on 27 July 2009, three monitoring locations in Phase 1 were identified and agreed as suitable monitoring locations by the ET, IEC and SGJV. Subsequently, two monitoring locations in Phase 2 were proposed by ET and agreed by IEC and SGJV via email in January 2011. These five monitoring locations are listed in **Table 2-1** and shown in **Figure 2-1**.

Table 2-1 Operation Phase LFG Monitoring Locations in EcoPark

Monitoring Station ID	Type	Locations
EP1-1	LFG vent pipe	Inside the landscaping area of Administration Building

EP2-2	Service void	HGC Broadband below-ground chamber outside Lot P3

Figure 2-2 is a replacement page for the EM&A Manual, in accordance with footnote to Figure 6.1 in the approved EM&A Manual, and shall be deemed to be included in the EM&A Manual.

Routine LFG monitoring shall be carried out on a quarterly basis. Should EPD alert the Operator that high LFG levels had been detected during monthly monitoring under the Siu Lang Shui Landfill restoration contract, then the Operator may be required to increase LFG monitoring to monthly until such time as EPD inform the Operator that quarterly monitoring can be resumed. To-date, EPD have not alerted the Operator.

2.2 Environmental Quality Performance Limits and EAP

The Action / Limit Levels and Event Action Plan (EAP) for LFG are shown in **Table 2-2**, below. These refer to LFG detected in excavations, utilities and any enclosed on-site areas. No other A/L Levels or EAPs are specified in the EM&A Manual for operation phase EM&A.

	Limit Level >1.5% CO ₂	<ul style="list-style-type: none"> Stop works Evacuate personnel / prohibit entry Increase ventilation to restore CO₂ to <0.5%

2.3 Environmental Audit of Non-Monitored Parameters

Site inspections provide a direct means to trigger and enforce the environmental protection and pollution control measures specified in the Environmental Impact Assessment (EIA) Report. To examine operational practice, site inspections are to be undertaken regularly by the ET once per month, and joint site inspections are to be carried out by the ET and IEC once per quarter. Ad hoc site inspections are also carried out if significant environmental problems are identified. In addition, inspections may be required subsequent to receipt of an environmental complaint, or as part of the investigation work, as specified in the EAP.

The following parameters are required to be audited as part of the operation phase EM&A programme:

1. Air Quality;
2. Water Quality;
3. Waste Management; and
4. Land Contamination.

2.4 Environmental Mitigation Measures

Environmental mitigation measures applicable to the operation phase EM&A as stated in the Implementation Schedule are summarised in **Appendix 1**.

8 COMPLAINTS

As of end-January 2011, six tenants (Champway, Shiu Wing, Hung Wai, Li Tong, Yan Oi Tong and St. James' Settlement) have commenced recycling activities within their lots. Telford commenced trial commissioning on 4 November 2010. No complaints related to recycling activities have been received in this reporting quarter.

9 CONCLUSIONS

This is the fifteenth quarterly EM&A report prepared for the operation phase of EcoPark and covers November 2010 to January 2011.

At present, there are eight tenants in EcoPark. As of end-January 2011, six tenants (Champway, Shiu Wing, Hung Wai, Li Tong, Yan Oi Tong and St. James' Settlement) have commenced recycling activities within their lots. Two tenants, Telford and Cosmos, have not commenced recycling activities as they are still carrying out preparatory works within their lots. The following throughputs occurred during the reporting quarter:

1. **Champway.** 334,895kg of cooking oil and 293,750kg of grease-trap waste were delivered and processed, producing 520,968kg of treated cooking oil, 784,160kg of biodiesel and 23,524kg of glycerine. A total of 155,838kg of waste was generated, including 30,640kg of inorganic waste, 53,575kg of organic waste and 71,623kg of water waste (semi-solid and slurry inclusive).
2. **Shiu Wing.** 1,913,150kg of waste metal was delivered and processed, producing the same amount of sheared heavy ferrous scrap on site. No waste was generated.
3. **Hung Wai.** 888,830kg of waste wood was delivered and processed, resulting in 1,449,000kg of wood chips as product output. No waste was generated.
4. **Li Tong.** 77,339kg of WEEE was delivered and processed, producing 6,168kg of metals and 27,293kg of non-metals. 1,752kg of general refuse was generated.
5. **Telford.** Although formal recycling activities are not currently being carried out, 110,000kg of waste plastics were delivered. Telford commenced trial commissioning on 4 November 2010.
6. **Cosmos.** No recycling activities are being carried out and no waste has been delivered.
7. **Yan Oi Tong.** 264,601kg of waste plastics were delivered and 213,741kg were processed. 36,350kg of general refuse was generated from mixed waste plastics.
8. **St James' Settlement.** 58,763kg of WEEE was delivered and processed, producing 915 pieces of repaired / refurbished EEE, 16,065kg of metals and 7,522kg of non-metals. 2,925kg of general refuse was generated.

In terms of monitoring during operation phase EM&A, only quarterly monitoring of landfill gas (LFG) is required at service voids and utility boxes "following construction". This is because part of EcoPark lies within the 250m "LFG consultation zone" for Siu Lang Shui Landfill, located to the north of EcoPark. Construction of Phase 1 was completed in July 2009, so LFG monitoring commenced in the next reporting quarter (August to October 2009). Construction of Phase 2 was completed in November 2010, so LFG monitoring commenced in the next reporting quarter (November 2010 to January 2011). LFG monitoring was undertaken on 17 January 2011 in this reporting quarter, and no Action/Limit Level exceedance was recorded.

The ET has conducted monthly site inspections based on the approved checklist. Since October 2009, the checklist has been used in the monthly site inspections for various tenants. Environmental deficiencies and general observations noted during the monthly site inspections were detailed in **Section 7**. Remedial actions were recommended to tenants, and the remedial status shall be followed up in the next monthly site inspection.

In the coming quarter, operation phase LFG monitoring for Phase 1 and Phase 2 shall continue.

12. The Tenant shall take all necessary measures as may be required by and to the satisfaction of the Director to ensure that the operation of all plant and equipment, installed or used on the Premises or in any building(s) or structure(s) or any part of any building(s) or structure(s) erected or to be erected thereon, will not result, not cause and/or will not contribute any noise (which exists or which is imminent) which disturbs or annoys the residents or occupiers of any adjoining or neighbouring lot or lots or premises, or causes and/or contributes to disturbance to the general public under the Noise Control Ordinance (Cap. 400 of the Laws of Hong Kong) any regulations made thereunder and any amending legislation.
13. The decision of the Director as to whether any such plant and equipment are causing disturbance or annoyance as aforesaid shall be final and binding on the Tenant.

The Tenant shall not permit, allow or suffer any fuel or chemical and any sewage, waste water or effluent containing sand, cement, silt or any suspended or dissolved material to flow, escape or run from the Premises onto any adjoining land or allow any waste matter which does not form part of the recovery and/or recycling and/or reprocessing operation or is not part of the final product of such operation to be deposited, kept, held or stored anywhere within the Premises and other areas of EcoPark. The Tenant shall at its own cost(s) have all such matters and all waste arising from recycling activities, chemical waste arising from maintenance of plant and equipment, sewage sludge (from WTF) and general daily waste from the operation removed from the Premises or any building(s) or structure(s) or any part of any building(s) or structure(s) erected or to be erected thereon in a proper manner to the satisfaction of the Director.
15. In any event, the Tenant shall at its own cost(s) comply with, inter alia, Conditions 4.11 and 4.12 of the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit – Application No.VEP-221/2006 regarding paving all areas of the Premises with concrete/using concrete hardstanding and siting all fuel tanks and chemical storage areas on the specified sealed areas, respectively (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to prevent land contamination). Water Pollution

16. In the event that the Tenant produces, generates, permits, causes, allows or suffers any discharge which is subject to control under the Water Pollution Control Ordinance (Cap. 358 of the Laws of Hong Kong) any regulations made thereunder and any amending legislation, and is not covered by a WTF Discharge Licence issued under the Water Pollution Control Ordinance (Cap. 358 of the Laws of Hong Kong) the Tenant shall apply to the Director for a licence and comply with the terms and conditions stipulated in the licence and the WTF Discharge Licence at the Tenant's own cost(s). Otherwise, the Tenant is not allowed to discharge directly or indirectly or to produce, generate, permit, cause, allow or suffer any discharge into any public sewer, storm-water drain, channel, stream-course, sea or any area inside or outside the Premises any trade effluent or foul or contaminated water or cooling or hot water. Subject to the said licence from the Director and WTF Discharge Licence, the Tenant shall at its own cost(s) separate, collect, discharge and send all process or industrial wastewater to the WTF for treatment to the standard required for discharge into a sewer leading to the sewage treatment works at Pillar Point or other treatment works specified in the licence.
17. Subject to obtaining advance written approval of the Director, the Tenant shall at its own cost(s) provide, install, operate and maintain its own waste water pre-treatment plants within the Premises if such process or industrial wastewater could not meet the influent limits / exceeds the maximum influent criteria of the WTF (in accordance with paragraph 7.2.9 of the

Action Items from This Audit

No.	Action	Expected By
1.	As advised by the Site Agent, in order to reduce the amount of dust generated during metal shearing, water was sprayed on metals. The wastewater generated should then be treated appropriately prior to discharge. A valid waste water discharge licence should be applied by the Tenant. In addition, information on the wastewater treatment process should be provided to the Environmental Team for revising the Process Review Checklist, which will then be re-issued.	15 Dec 2010

Follow-up from Previous Audits

No.	Follow-up from Previous Audit Dated 30 August 2010	Status
1.	A copy of the Chemical Waste Producer Registry was passed to the Operator for record.	Closed
2.	Following the confirmation from the laboratory on the presence of asbestos attached on waste metal, the Tenant has handled such waste carefully e.g. provided full coverage to the waste and placed it in a covered place. The Tenant has also engaged Waylung Waste Services Ltd. which is a licenced collector for Asbestos Waste (including Vehicle Brake/Clutch Linings) to collect and process the waste, which will take place shortly.	Expected to be completed by 15 Dec 2010

Audit Summary and Sign-off

The site is generally tidy. The Tenant should provide appropriate treatment to the wastewater generated from metal shearing.

Follow-up from Previous Audits

No.	Follow-up from Previous Audit Dated 23 November 2010	Status
1.	The Tenant continued to handle the asbestos containing materials (ACM) carefully e.g. provided full coverage to the ACM and placed it in a covered place. While the approval of Chemical Waste Disposal Licence is pending, the Tenant has engaged Waylung Waste Services Ltd., a licenced collector for ACM (including Vehicle Brake/Clutch Linings) to collect and process the materials, which will take place as soon as the licence is ready. (Repeated observation since 30 August 2010)	Expected to be completed by 15 Jan 2011
2.	As advised by the Tenant, water was no longer sprayed on metals to reduce the amount of dust generated during metal shearing. Consequently no wastewater is generated at the lot, and there is no need to apply the Wastewater Discharge Licence and revise the Process Review Checklist. The Environmental Team will continue to examine if the recycling process would generate any wastewater.	Closed
