EXECUTIVE SUMMARY

General

EcoPark is a key element in the Government's waste management policy that aims at promoting the local recycling industry by providing long-term land at affordable rents, thereby encouraging investment in advanced technology and value-added recycling processes. EcoPark is being developed in two phases at site in Tuen Mun Area 38 as shown in *Figure 1-1*. The contract for the management of EcoPark – Contract No. *EP/SP/102/17 Provision of Management Services for EcoPark 2018* was awarded to Urban Property Management Limited (UPML) by Environmental Protection Department (EPD) effective from 30th October 2018.

UPML, the "Operator" of EcoPark, have appointed Allied Environmental Consultants Ltd. (AEC) as the Environmental Team (ET) to carry out the Environmental Monitoring and Audit (EM&A) works for the operation of EcoPark as required by the EM&A Manual and in accordance with the conditions of the Environmental Permit (EP) (EP-226/2005/F).

This is the fifty-second (52nd) quarterly EM&A report prepared for the operation phase of EcoPark and covers the quarter from January to March 2020. In the reporting quarter, there were twelve tenants in EcoPark Phase 1 and Phase 2, one operator of Lot T7 in EcoPark Phase 1 and one operator of WEEE.PARK in EcoPark Phase 2. The details are provided as below:

Phase 1 tenants and operator comprise:

- Champway Technology Ltd. (Champway) Waste cooking oil
- 3R Hong Kong International Eco-Pioneer Ltd. (3R) Waste plastics
- Hong Kong Biomass (Wood) Collect and Recycle Co. Ltd. (HK Biomass) Waste wood
- Baguio Waste Management & Recycling Ltd. (Baguio) Waste plastics
- HP Telford Envirotech Group Ltd. (HP Telford) Waste plastics
- Food Waste Management Group (FWMG) of EPD Waste wood

Phase 2 tenants and operator comprise:

- K.Wah Construction Products Ltd. (K.Wah) Waste construction materials/waste glass
- E. Tech Management (HK) Ltd. (E. Tech) WEEE
- On Fat Lung Innovative Resources Ltd. (On Fat Lung) Waste rubber tyres
- Chung Yue Steel Group Company Ltd. (Chung Yue) Waste metals
- Hong Kong Battery Recycling Centre Ltd. (HKBRC) Waste lead-acid batteries
- South China Reborn Resources (Zhongshan) Co. Ltd. (South China) Food waste
- WEEE.PARK operated by Alba Integrated Waste Solutions (Hong Kong) Ltd. (Alba IWS) –
 WEEE
- Rocsky International Ltd. (Rocsky) Waste Paper

Recycling activities of WEEE.PARK in Lots P2-P4, FWMG of EPD in Lot T7 and the following eight active tenants were audited in the reporting quarter: Champway, HK Biomass, HP Telford, K. Wah, E. Tech, On Fat Lung, Chung Yue and South China. The lots possessed by HKBRC (i.e. Lots P9 & P10), 3R (i.e. Lots T2 & T3), Baguio (i.e. Lot T6) and Rocsky (i.e. Lots P1, P5, P6 and P7) were inspected but not audited under the EM&A programme during the reporting quarter, as no recycling activities were conducted.

In this reporting quarter, site inspections were conducted by the Operator and the ET on 16th January, 18th February and 19th March 2020. IEC also carried out random site audits on 16th January and 19th March 2020. A quarterly joint site inspection was carried out by the Operator, the IEC and the ET on 18th February 2020.

Throughput of Materials / Waste Generated

The throughputs of WEEE.PARK and the eight active tenants in the reporting quarter are summarised below. Please note that product output plus waste disposal does not necessarily equal the waste input, due to material losses during processing and material retained within the lots.

Material Type	Waste Input (tonne)	Product Output ⁽⁴⁾ (tonne)	Waste Disposed ⁽⁴⁾ (tonne)
Waste Organic Food	1,767	1,396	167
Waste Ferrous Metals	16,127	12,365	128
Waste Wood	148	36	-
Waste Electronics	5,180	4,219	714
Waste Plastics	247	144	-
Construction Waste	1,790	7.650	5
Waste Glass	824	7,650	3
Waste Rubber Tyres	n/a	n/a	n/a

Notes:

- 1) The throughput data presented above is the best available data and has been rounded off to the nearest whole tonne for presentation.
- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.
- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.
- 5) "-" in the column of waste disposal denotes zero quantity; while "n/a" denotes unavailable information.

Exceedances of Any Measured Action / Limit Levels

The northern part of EcoPark is located within the 250m Landfill Gas (LFG) Consultation Zone of Shiu Lang Shui Landfill. LFG monitoring during this quarter was undertaken on 19th March 2020 at five locations (three in Phase 1 and two in Phase 2). No exceedance of Action or Limit Level was recorded in the reporting quarter.

Summary of Complaints, Summons and Prosecutions

Number of complaints, summons and successful prosecutions in the reporting quarter are summarised below.

• Complaints: Zero.

3

- **Summons:** Zero.
- Successful Prosecutions: Zero

Reporting Changes

There is no change in the reporting quarter.

Future Key Issues

No key issues are anticipated in the next reporting quarter.

Issue 1______ AEC

1 PROJECT BACKGROUND

1.1 Project Overview

- 1.1.1 In the document "A Policy Framework for the Management of Municipal Solid Waste (2005 –2014)", the government set out a comprehensive policy to support the recycling industry. This included allocating suitable land, encouraging research and development, introducing environmental legislation and providing effective support measures. In May 2013, the Environment Bureau launched "Hong Kong Blueprint for Sustainable Use of Resources 2013 2022", which promised continuing support for the recycling industry.
- 1.1.2 EcoPark was developed to support the local recycling industry by providing long-term land at affordable rents, thereby encouraging investment in advanced technology and value-added recycling processes.
- 1.1.3 EcoPark, as shown in *Figure 1-1*, has been developed in Tuen Mun Area 38 in two phases (Phase1 and Phase 2) under Contract *EP/SP/52/06 Development of EcoPark in Tuen Mun Area 38*, which was awarded to Kaden Construction Ltd by the Environmental Protection Department (EPD) in June 2006. Phase 1 construction was completed in July 2009 and Phase 2 construction was completed in November 2010.
- 1.1.4 The contract for the management of EcoPark Contract No. *EP/SP/102/17 Provision of Management Services for EcoPark 2018* was awarded to Urban Property Management Limited (UPML) by Environmental Protection Department (EPD) effective from 30th October 2018.
- 1.1.5 UPML, the "Operator" of EcoPark, has appointed Allied Environmental Consultants Ltd. (AEC) as the Environmental Team (ET) to carry out the Environmental Monitoring and Audit (EM&A) works for the operation of EcoPark as required by the EM&A Manual and in accordance with the conditions of the Environmental Permit (EP-226/2005/F). Ove Arup & Partners Hong Kong Ltd. (Arup) has been appointed by the EPD as the Independent Environmental Checker (IEC) for the Project. The ET and the IEC carry out the EM&A works for EcoPark as required by the EM&A Manual and in accordance with the conditions of the Environmental Permit (EP).

1.2 Operation Programme

- 1.2.1 In the reporting period, there were twelve tenants in EcoPark, one operator of Lot T7 and one operator of WEEE.PARK:
 - Alba Integrated Waste Solutions (Hong Kong) Ltd. (Alba IWS) for WEEE.PARK, Food Waste Management Group (FWMG) of EPD for Lot T7, and eight other active tenants (Champway, HK Biomass, HP Telford, Chung Yue, K.Wah, South China, E. Tech and On Fat Lung) who have carried out full recycling operations;
 - HKBRC was without any site operation;
 - One tenant (Baguio) is carrying out building works but without any site operation; and

• Two tenants (3R and Rocsky) are under pre-construction works but without any site operation.

1.3 Project Organisation and Contact Personnel

1.3.1 Key personnel and contact particulars are summarised in *Table 1.1*.

Table 1.1 EM&A Personnel Contact Details

Position	Name	Email Address	Phone No.	
Project Proponent – EPD				
Principal EPO	Mr. Gary C. W. Tam garytam@epd.gov.hk		3690 7860	
Operator – UPML				
Project Manager	Ms. Raindy YIP	raindy.py.yip@urban.com.hk	2212 5900	
Park Manager	Ms. May WU	may.sm.wu@urban.com.hk	2212 5920	
IEC – Ove Arup				
IEC	Mr. Sam TSOI	sam.tsoi@arup.com	2268 3208	
ET-AEC				
ET Leader	Ir. Dr. James WONG	jw@aechk.com	2815 7028	

1.3.2 The organisational structure and lines of communication for the operation of EcoPark with respect to environmental management is given in *Figure 1-2* and *Figure 1-3* respectively.

Figure 1-1 Location of EcoPark in Tuen Mun Area 38

Site Boundary Phase 1 Tenants Phase 2 Tenants

Issue 1_____AEC

Figure 1-2 Organisation Chart of UPML

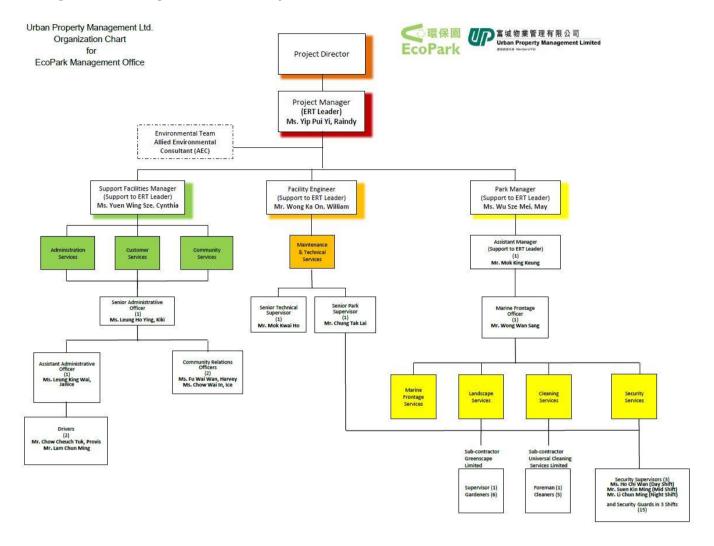

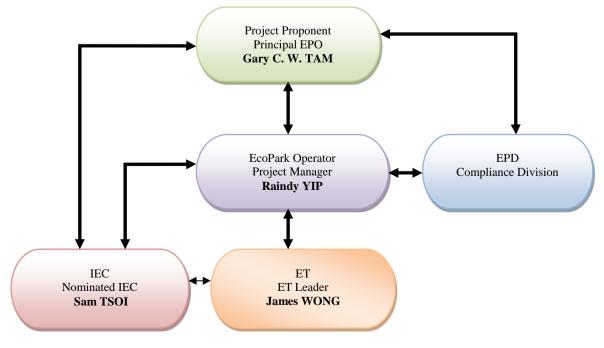

Figure 1-3 Organisation Chart of EM&A Works (Operation)

2 SUMMARY OF EM&A REQUIREMENT

2.1 Monitoring Parameters

- 2.1.1 Landfill Gas (LFG) is required to be monitored quarterly at service voids and utility boxes within EcoPark because the northern part of EcoPark lies within the 250m LFG Consultation Zone for Siu Lang Shui Landfill, which is located to the north of EcoPark.
- 2.1.2 Operational LFG monitoring has been carried out in Phase 1 after completion of construction in July 2009, commencing in the August to October 2009 quarter. In Phase 2, monitoring has been carried out after completion of construction in November 2010, commencing in the November 2010 to January 2011 quarter.
- 2.1.3 The location for LFG monitoring was not specified in the EM&A Manual since the final design of EcoPark was not available when the EM&A Manual was approved. Therefore, during a joint site inspection on 27th July 2009, three monitoring locations were identified and agreed as suitable monitoring locations by the former ET (SMEC Asia Ltd.), IEC (Atkins China Ltd.) and the Operator (Serco Guardian Joint Venture). Subsequently, two more monitoring locations in Phase 2 were proposed by the former ET and agreed by the IEC and Operator via email in January 2011. These five monitoring locations are listed in *Table 2.1* and shown in *Figure 2-1*.

Table 2.1 Operation Phase LFG Monitoring Locations in EcoPark

Monitoring Station ID	Type Locations			
EP1-1 LFG vent pipe Inside		Inside the landscaping area of Administration Building		
EP1-2 Service void		PCCW below-ground chamber outside Lot T1		
EP1-3	Service void	HGC Broadband below-ground chamber outside Lot T3		
EP2-1	Service void	HGC Broadband below-ground chamber outside Lot P1		
EP2-2	Service void	HGC Broadband below-ground chamber outside Lot P3		

2.1.4 Routine LFG monitoring has been carried out on a quarterly basis. Should EPD alert the Operator that high LFG levels have been detected during monthly monitoring under the Siu Lang Shui Landfill restoration contract, the Operator may be required to increase LFG monitoring to monthly until such time as EPD inform the Operator that quarterly monitoring can be resumed. No detection of high LFG levels under Siu Lang Shui Landfill restoration contract was received from EPD in the reporting quarter.

2.2 Environmental Quality Performance Limits and EAP

2.2.1 The Action/Limit Levels and Event Action Plan (EAP) for LFG are shown in *Table 2.2* below. These refer to LFG detected in excavations, utilities and any enclosed on-site areas. No other A/L Levels or EAPs are specified in the EM&A Manual for the operation phase EM&A.

Table 2.2 Action Levels, Limit Levels and Event and Action Plan for LFG

Parameter	Level	Action	
	Action Level <19% O2	• Ventilate trench/void to restore O ₂ to >19%	
Oxygen (O ₂)	Limit Level <18% O ₂	 Stop works Evacuate personnel/prohibit entry Increase ventilation to restore O₂ to >19% 	
Methane	Action Level >10% LEL	 Post "No Smoking" signs Prohibit hot works Increase ventilation to restore CH₄ to <10% LEL 	
(CH ₄)	Limit Level >20% LEL	 Stop works Evacuate personnel/prohibit entry Increase ventilation to restore CH₄ to <10% LEL 	
Conform	Action Level >0.5% CO ₂	• Ventilate to restore CO ₂ to <0.5%	
Carbon Dioxide (CO ₂)	Limit Level >1.5% CO ₂	 Stop works Evacuate personnel/prohibit entry Increase ventilation to restore CO₂ to <0.5% 	

2.3 Environmental Audit of Non-Monitored Parameters

- 2.3.1 Site inspections provide a direct means to trigger and enforce the environmental protection and pollution control measures specified in the Environmental Impact Assessment (EIA) Report. To examine operational practice, site inspections are to be undertaken by the ET once per month. The monthly inspection shall join with the random site inspection by the IEC where possible. A joint inspection by ET and IEC will be carried out at least once per quarter. Ad hoc site inspections are also carried out if significant environmental problems are identified. In addition, inspections may be required subsequent to receipt of environmental complaint, or as part of the investigation work, as specified in the EAP.
- 2.3.2 The following parameters are required to be audited as part of the operation phase EM&A program:
 - Air Quality
 - Water Quality
 - Waste Management
 - Land Contamination

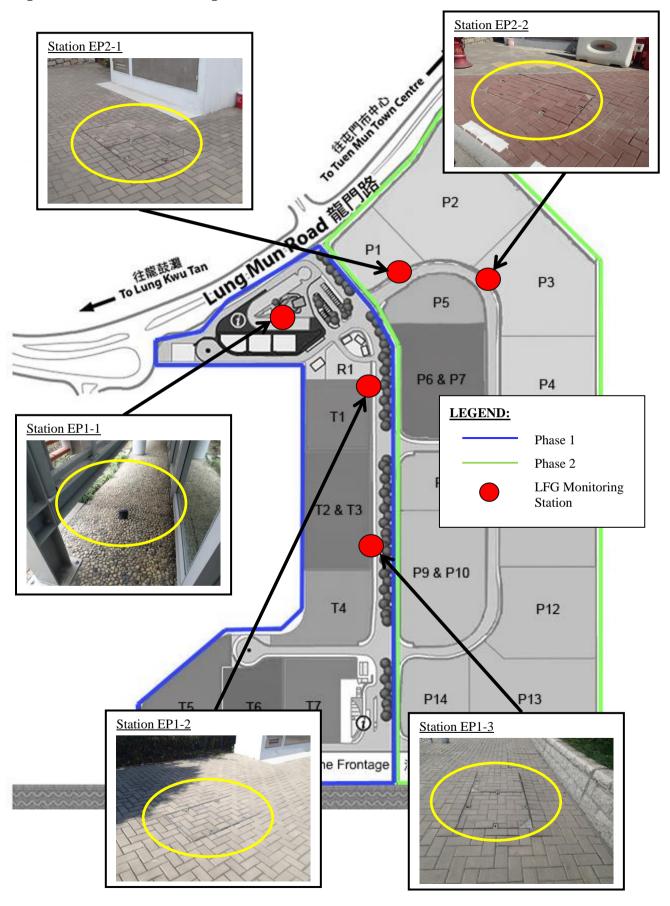

2.4 Environmental Mitigation Measures

2.4.1 Environmental mitigation measures applicable to the operation phase EM&A as stated in the Implementation Schedule are summarised in *Appendix 1*.

2.5 Environmental Requirements in Tenancy Agreements

2.5.1 Environmental requirements specified in tenancy agreements are provided in *Appendix 2*.

Figure 2-1 LFG Monitoring Locations within EcoPark

Issue 1_____AEC

3 OPERATION STATUS

3.1 General

- 3.1.1 The location of lots within EcoPark, the current usage and tenant names are shown in *Figure 3-1*. A summary of waste throughputs is provided in *Section 3.12*. Brief descriptions of the active tenants and operators are provided from *Sections 3.2* to *3.10*.
- 3.1.2 In the reporting quarter:
 - HKBRC was without any site operation;
 - Baguio was carrying out building works; and
 - 3R and Rocsky were under pre-construction work.

3.2 Champway Technology Limited

- **Lot No.:** T5 (Phase 1)
- **Lot Size:** Approx. 6,000m²
- Activity: Recycling of Organic Waste (Waste Cooking Oil)
- **Recycling Process:** Turn waste cooking oil into biodiesel by extraction, neutralisation, separation and distillation.
- 3.2.1 In this reporting quarter, waste cooking oil was recycled. Bi-monthly samplings for effluent arising from producing biodiesel have been conducted to comply with the requirement of effluent discharge licence.

3.3 Hong Kong Biomass (Wood) Collect and Recycle Company Limited

- **Lot No.:** T4 (Phase 1)
- **Lot Size:** Approx. 5,000m²
- Activity: Recycling of Waste Woods
- **Recycling Process:** Recycle waste woods to wood fuel pellets. Ferrous metals will be separated by magnets.
- 3.3.1 In this reporting quarter, waste wood was recycled.

3.4 HP Telford Envirotech Group Limited

- **Lot No.:** T1 (Phase 1)
- Lot Size: Approx. 5,000m²
- Activity: Recycling of Waste Plastics
- Recycling Process: Sorting, shredding and baling of waste plastic

3.4.1 In this reporting quarter, waste plastics were recycled.

3.5 Chung Yue Steel Group Company Limited

- **Lot No.:** P13 (Phase 2)
- **Lot Size:** Approx. 10,000 m²
- Activity: Recycling of Waste Metals
- **Recycling Process:** Turn waste metals into non-ferrous scrap, light ferrous scrap and heavy ferrous scrap by sorting, baling and shearing.
- 3.5.1 In this reporting quarter, waste metals were recycled.

3.6 K. Wah Construction Products Ltd.

- **Lot No.:** P11 (Phase 2)
- **Lot Size:** Approx. 10,000 m²
- Activity: Recycling of Waste Construction Materials/Waste Glass
- Recycling Process: Waste construction materials and waste glass will be crushed and delivered to the concrete mixing plant for blending and poured into block machine for casting. The blocks will then be cured, washed and packaged.
- 3.6.1 In this reporting quarter, waste construction materials and waste glasses were recycled.

3.7 South China Reborn Resources (Zhongshan) Company Ltd.

- **Lot No.:** P12 (Phase 2)
- **Lot Size:** Approx. 9,000 m²
- Activity: Recycling of Organic Waste (Food Waste)
- **Recycling Process:** Food waste will be segregated. The recyclable portion will undergo deodorisation, dewatering, shredding, fermentation and drying to produce high protein animal feed for livestock farming and aquaculture.
- 3.7.1 In this reporting quarter, food waste was recycled. Also, the tenant adopted "tankered away" approach for handling of industrial effluent arising from the recycling of food waste instead of discharging into foul sewer.

3.8 WEEE.PARK

- Lot No.: P2, P3, P4 (Phase 2)
- **Lot Size:** Approx. 30,000 m²
- **Activity:** Recycling of WEEE
- Recycling Process: Four major types of WEEE (i.e. refrigerator and freezers, air conditioners, e-scrap, TV and computer screens) will be recycled. The recycling

processes include separation of insulation/backlighting/plastics/various metals, recovery of screen/monitor stand/refrigerant/oil/hazardous materials, and shredding of casing.

3.8.1 In this reporting quarter, WEEE was recycled.

3.9 On Fat Lung Innovative Resources Ltd.

- **Lot No.:** P8 (Phase 2)
- **Lot Size:** Approx. 4,400 m²
- Activity: Recycling of Waste Rubber Tyres and WEEE
- Recycling Process: Waste rubber tyres will be shredded into rubber powder and processed to form rubber bricks. WEEE will be dismantled/shredded and recovered for reusable components.
- 3.9.1 In this reporting quarter, waste rubber tyres were recycled.

3.10 Food Waste Management Group (FWMG) of EPD

- **Lot No.:** T7 (Phase 1)
- **Lot Size:** Approx. 4,000m²
- Activity: Temporary storage of wood chip and waste trees handling
- **Recycling Process:** Bulk reduction of waste tree by mechanical shearing and chipping.
- 3.10.1 In this reporting quarter, temporary storage of wood chip and waste trees handling were conducted.

3.11 E. Tech Management (HK) Limited

- **Lot No.:** P14 (Phase 2)
- Lot Size: Approx. 5,000m²
- **Activity:** Recycling of WEEE
- **Recycling Process:** CRT, computer/electronics, white goods and florescent lamps will be recycled. The recycling processes include testing and dismantling of components, repair of refurbished equipment, sorting for reusable components and shredding for scrap..
- 3.11.1 In this reporting quarter, WEEE was recycled.

3.12 Throughput Statistics

3.12.1 For the active recyclers, most of the incoming waste materials and outgoing products were delivered by land transportation, except for the metals from Chung Yue were delivered by both marine and land transportation.

3.12.2 The throughputs of WEEE.PARK and the eight active tenants are summarised in *Table* 3.1 below. Please note that product output plus waste disposal does not necessarily equal the waste input, due to material losses during processing and material retained within the lot.

Table 3.1 Throughput Statistics for the Reporting Quarter

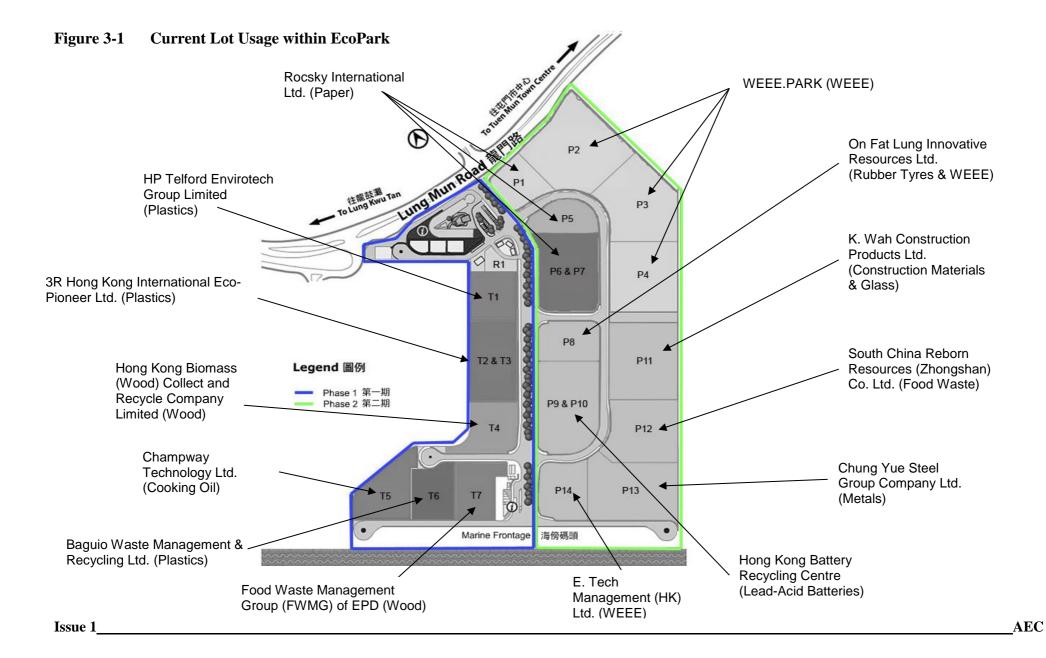

Material Type	Waste Input (tonne)	Product Output (4) (tonne)	Waste Disposed (4) (tonne)
Waste Organic Food	1,767	1,396	167
Waste Ferrous Metals	16,127	12,365	128
Waste Wood	148	36	-
Waste Electronics	5,180	4,219	714
Waste Plastics	247	144	-
Construction Waste	1,790	7.650	5
Waste Glass	824	7,650	3
Waste Rubber Tyres	n/a	n/a	n/a

Notes:

- The throughput data presented above is the best available data and has been rounded off to the nearest whole tonne for presentation.
- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.
- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.
- 5) "-" in the column of waste disposal denotes zero quantity; while "n/a" denotes unavailable information.
- 3.12.3 Detailed throughput figures of the reporting quarter are provided in *Appendix 3.1*. Updated throughput figures of the previous months are provided in *Appendix 3.2*.

3.13 Process Review

- 3.13.1 Process Review, and possibly Design Audit (DA) where required, had been conducted for each recycling process to be operated within EcoPark to confirm its compliance with the findings and recommendations of the EIA report and the conditions of the EP.
- 3.13.2 Since 2008, twenty four process reviews and three DAs had been approved. Among those, sixteen process reviews and three DAs are related to the current recycling processes in EcoPark as of March 2020. In the reporting period, neither process review nor DA were approved in the reporting period. Full set of the completed PRCs and DAs are submitted separately to relevant authorities in EPD.

4 IMPLEMENTATION STATUS OF ENVIRONMENTAL PROTECTION MEASURES

- 4.1.1 Environmental mitigation measures applicable to the operation phase EM&A as stated in the implementation schedule are summarised in *Appendix 1*. Environmental requirements specified in tenancy agreements are summarised in *Appendix 2*.
- 4.1.2 By the end of March 2020, WEEE.PARK, Lot T7 (FWMG of EPD) and eight tenants (Champway, HK Biomass, HP Telford, K. Wah, E. Tech, Chung Yue, South China and On Fat Lung) were under full operation.
- 4.1.3 Appropriate environmental protection measures are in place at all lots.

5 MONITORING RESULTS

5.1 Monitoring Date, Time, Frequency and Duration

5.1.1 As described in *Section 2.1*, operational LFG monitoring is conducted quarterly at five monitoring locations, three in Phase 1 and two in Phase 2. In this reporting quarter, monitoring was undertaken on 19th March 2020. Monitoring details are shown *Table 5.1* below.

Table 5.1 Sampling Schedule for the Quarterly LFG Monitoring

Station ID	Sampling Date	Time	Duration	Ambient Air Temp.	Weather
EP1-1		09:40 - 09:42	2 minutes	21°C	Overcast
EP1-2		10:00 - 10:02	2 minutes	21°C	Overcast
EP1-3	19 th March 2020	09:57 – 09:59	2 minutes	21°C	Overcast
EP2-1		09:50 - 09:52	2 minutes	21°C	Overcast
EP2-2		09:52 - 09:54	2 minutes	21°C	Overcast

5.2 Monitoring Methodology, Parameters and Equipment

5.2.1 The LFG monitoring requirement and methodology are stipulated in *Section 6* of the EM&A Manual. The LFG monitoring parameters and their measurement ranges are detailed in *Table 5.2* below.

Table 5.2 Parameters and Measurement Ranges for LFG Monitoring

Parameters	Measurement Ranges
Methane (CH ₄)	0 – 100% LEL & 0-100% v/v
Oxygen (O ₂)	0 - 25% v/v
Carbon Dioxide (CO ₂)	0 – 100% v/v
Barometric Pressure	mBar (absolute)

- 5.2.2 LFG monitoring shall be carried out using intrinsically-safe, portable multi-gas monitoring instruments. The gas monitoring equipment shall:
 - 1. Where possible, comply with BS 6020 and be approved by BASEEFA as intrinsically safe, suitable for use in a Zone 2 are to BS 5345;
 - 2. Be capable of continuous monitoring of methane, oxygen and carbon dioxide;
 - 3. Be capable of continuous barometric pressure and gas pressure measurements;
 - 4. Normally operate in diffusion mode unless required for spot sampling, when it should be capable of operating by means of an aspirator or pump;

- 5. Have low battery, fault and over range indication incorporated;
- 6. Store monitoring data, and shall be capable of being down-loaded directly to a PC; and

mBar (absolute)

7. Measure in the following ranges:

Barometric pressure

- Methane 0 - 100% LEL & 0 - 100% v/v

- Oxygen 0-25% v/v- Carbon dioxide 0-100% v/v

5.3 Results and Graphical Plots of Monitoring Parameters

- 5.3.1 One InfraRed Gas Analyser Model GA5000 (serial number G501982) was used for LFG measurements. The gas analyser is calibrated every 6 months. *Appendix 4* presents the calibration records of the monitoring equipment.
- 5.3.2 LFG monitoring results are summarised in *Table 5.3* and compared with the Action and Limit Levels tabulated in *Table 2.2*. Graphical plots of the monitoring results are also provided in *Appendix 5*.

Table 5.3 Quarterly LFG Monitoring Results in the Reporting Quarter

		Monitoring Results				
Station ID	Sampling Date	Methane (% v/v)	Methane (% LEL)	Oxygen (% v/v)	Carbon Dioxide (% v/v)	Barometric Pressure (mBar)
EP1-1		0.2	4	20.7	< 0.1	1018
EP1-2	10th Manala	0.1	2	20.5	< 0.1	1018
EP1-3	19 th March 2020	0.1	2	20.5	< 0.1	1018
EP2-1	2020	0.1	2	20.6	< 0.1	1018
EP2-2		0.1	2	20.3	< 0.1	1018

5.3.3 No exceedance of Action and Limit Levels was recorded in the reporting quarter.

6 SUMMARY OF ENVIRONMENTAL AUDIT

6.1 General

- 6.1.1 In the reporting quarter, WEEE.PARK, Lot T7 (FWMG of EPD) and eight active tenants were under full operation.
- 6.1.2 Environmental audits based on the approved site inspection checklist were carried out by the Operator and the ET on 16th January, 18th February and 19th March 2020. IEC random site audits were also carried out on 16th January and 19th March 2020. A quarterly joint site inspection was carried out by the Operator, the IEC and the ET on 18th February 2020. The completed audit checklists for tenants are provided in *Appendix 6*.

6.2 Champway Technology Limited

6.2.1 Audit observations from previous reporting quarters and this reporting quarter are summarised in *Table 6.1* below. The completed checklists for Champway are given in *Appendix 6.1*.

Table 6.1 Environmental Audit Findings for Champway

Date	Item	Comment	Status		
Observations I	Observations From Previous Reporting Quarters				
19 Mar 2019	No labelling is provided to the chemical waste and chemical waste storage area, which should also be provided with adequate ventilation.	The tenant should review relevant requirements stipulated in the Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes and provide proper labelling to the chemical waste and chemical waste storage area with adequate ventilation.	As observed on 16 Jan 2020, a proper signage for the relocated chemical waste storage area at the northern part of the lot was provided by the tenant. The chemical container without securely attached chemical waste label was removed from the storage area.		
24 Jul 2019	No chemical waste label is provided on one of the chemical waste containers which stored at the chemical waste storage area.	The tenant was reminded to provide proper chemical waste labels to all chemical waste containers.	As observed on 16 Jan 2020, a proper signage for the relocated chemical waste storage area at the northern part of the lot was provided by the tenant. The chemical container without securely attached chemical waste label was removed from the storage area.		

Date	Item	Comment	Status
22 Oct 2019	General refuse was observed in the perimeter drain next to the exhaust of carbon filter.	The tenant was reminded to remove the refuse in order to prevent any blockage.	As observed on 18 Feb 2020, general refuse had been cleared from the perimeter drain next to the exhaust of carbon filter.
22 Oct 2019	Milky discharge was observed in the stormwater drain at the entrance area.	The tenant was reminded to prevent any untreated runoff from discharging to the stormwater drain which should follow the discharge standard of the WPCO discharge licence.	Milky oil discharge were still observed in the stormwater drain at the entrance area during the inspection in 19 Mar 2020. The status will be reviewed in the next inspection in Apr 2020.
22 Oct 2019	Grease was observed accumulated at the storage tank area.	The tenant was reminded to regularly clear it and seal up in between the concrete barriers to prevent any potential leakage into the perimeter drain.	As no grease was observed in perimeter drain adjacent to filter press system during regular site inspections between November 2019 and February 2020, it is considered that the current measures, such as concrete barriers and regular waste removal, are sufficient to prevent oil product from entering into perimeter drain.
22 Oct 2019	The bi-monthly sampling record of effluent discharge for Sep 2019 was outstanding while the results for effluent sampling in Oct 2019 was presented during ET's inspection.	The tenant should keep records of bi-monthly sampling results for vetting and provide the renewed Licence once available.	As observed on 16 Jan 2020, under the renewed discharge licence, bi-monthly sampling results complying with discharge limitations was provided by the tenant.
19 Nov 2019	Oil spillage was found in adjacent to the chemical waste storage area owing to machinery repairment	The tenant should clean up the spillage with sufficient absorbent and dispose of as chemical waste.	As observed on 16 Jan 2020, oil spillage adjacent to the chemical waste storage area owing to machinery repairment had been removed.
23 Dec 2019	Oil spillage was observed adjacent to the cooling tower.	Same as the item.	As observed on 16 Jan 2020, the oil spillage adjacent to the cooling tower had been cleaned up.

Date	Item	Comment	Status
23 Dec 2019	Oil stain was found at the vehicular access.	The tenant was requested to clean up the stain.	Although most of the oil stain had been removed, a portion of oil stain was still found at the vehicular during the inspection on 19 Mar 2020. The status will be reviewed in the next inspection in Apr 2020.
Observations I	From This Reporting	Quarter	
16 Jan 2020	Two dark oil stains were observed on the floor between toilet and blower area.	The tenant should clean the stains off the floor by using absorbent material and dispose of as chemical waste.	As observed on 18 Feb 2020, two dark oil stains observed on the floor between toilet and blower area was removed.
18 Feb 2020	No new critical issu	e was identified.	
19 Mar 2020	Oil spillage was observed nearby the tray of waste oil sludge stockpile.	The tenant was reminded to clean up the oil spillage.	The status will be reviewed in the next inspection in Apr 2020.

6.3 Hong Kong Biomass (Wood) Collect and Recycle Company Limited

6.3.1 Audit observations from previous reporting quarters and this reporting quarter are summarised in *Table 6.2* below. The completed checklist for HK Biomass is given in *Appendix 6.2*.

7 ENVIRONMENTAL COMPLAINTS, NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTION

7.1 Follow-up on Previous Environmental Complaint

Wastewater Treatment at South China received on 26th October 2016

- 7.1.1 Flow meters were installed at various points of the wastewater treatment system, e.g. incoming pipe for the storage tank at 3/F, the outgoing pipe of the treatment tank for recycling, the wastewater collection pipes for washing area at G/F, etc. The flow data was recorded to monitor the quantity of wastewater generated from different areas. During this reporting quarter, no discharge of wastewater was recorded based on the flow data record inspected. The wastewater was collected and transported to designated treatment facility by a licenced collector as a temporary measure.
- 7.1.2 As verbally informed by the tenant, the expired discharge licence would not be renewed and the upgrade of the WTP would not be carried out. The wastewater would continually be collected and transported to designated treatment facility by a licenced collector.
- 7.2 New Environmental Complaint, Notification of Summon and Successful Prosecution in the Reporting Period
- 7.2.1 By the end of March 2020, no complaint or notification of summon or successful prosecution related to recycling activities was received in this reporting quarter.

28

EcoPark Operation

8 CONCLUSIONS

- 8.1.1 This is the fifty-second (52nd) quarterly EM&A report prepared for the operation phase of EcoPark and covers the reporting quarter from January to March 2020. The recycling activities are audited on a monthly basis and the results are summarised in this report. In the reporting quarter, there were twelve tenants in EcoPark Phase 1 and Phase 2, one operator (FWMG of EPD) of Lot T7 in EcoPark Phase 1 and one operator (Alba IWS) in EcoPark Phase 2.
- 8.1.2 The ET has conducted monthly site inspections while the IEC has carried out full site inspection on quarterly basis and random site audits on monthly basis, and some general observations have been made. The approved checklist has been used in the monthly site inspections for various tenants.
- 8.1.3 The throughputs of WEEE.PARK and the eight active tenants in the reporting quarter are summarised in *Table 8.1*. Please note that product output plus waste disposal do not necessarily equal the waste input, due to material losses during processing and material retained within the lots.

Material Type	Waste Input (tonne)	Product Output (4) (tonne)	Waste Disposed (4) (tonne)	
Waste Organic Food	1,767	1,396	167	
Waste Ferrous Metals	16,127	12,365	128	
Waste Wood	148	36	-	
Waste Electronics	5,180	4,219	714	
Waste Plastics	247	144	-	
Construction Waste	1,790	7 650	5	
Waste Glass	824	7,650	3	
			1	

Table 8.1 Throughput Statistics for the Reporting Quarter

Notes:

Waste Rubber Tyres

1) The throughput data presented above is the best available data and has been rounded off to the nearest whole tonne for presentation.

n/a

n/a

- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.

n/a

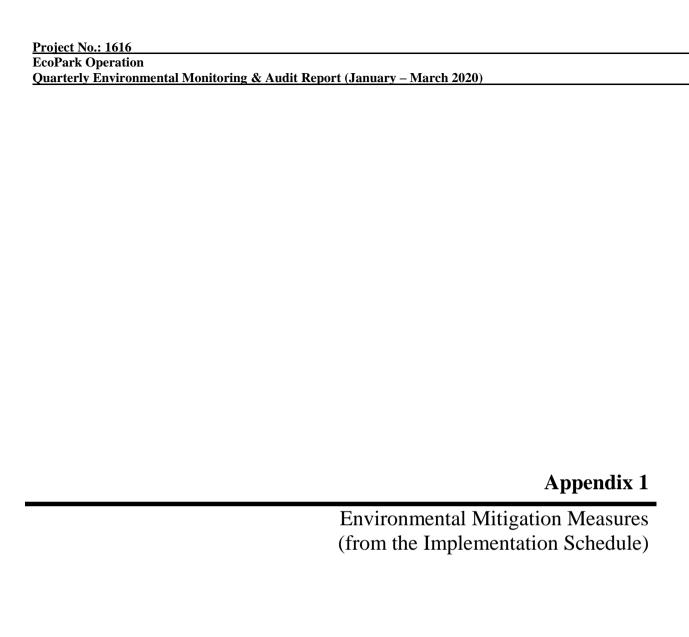

- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.
- 5) "-" in the column of waste disposal denotes zero quantity; while "n/a" denotes unavailable information.
- 8.1.4 LFG monitoring during the reporting quarter was undertaken on 19th March 2020 at five locations (three in Phase 1 and two in Phase 2). No exceedance of Action or Limit Level was recorded in the reporting quarter.
- 8.1.5 Numbers of complaints, summons and successful prosecutions in the reporting quarter are summarised below:

• **Complaints:** Zero.

<u> 29</u>

- **Summons:** Zero.
- Successful Prosecutions: Zero.
- 8.1.6 In the next reporting quarter, LFG monitoring in operation phase for Phase 1 and Phase 2 will be continued.

Issue 1______AEC

EIA Ref.	EM&A Ref.	Environmental Protection Measures Identified in the Implementation Schedule that are Applicable to the Operation Phase of EcoPark	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Relevant Legislation and Guidelines
General					
5.5.23 to 5.5.25, 10.2.24 & 10.2.37	4.2.5 to 4.2.8	The Operator shall develop and implement an Emergency Response Plan (ERP) that lists the procedures to be followed in case of fire, fuel or chemical spillage or other emergency within the EcoPark.	Throughout the duration of the operation.	Operator	
12.2	7.2	No process shall be allowed to operate within EcoPark without approval from WFBU. Approval will be based on the ten-step Process Review, which may include a Design Audit if deemed to be necessary.	Throughout the duration of the operation.	ET IEC Project Proponent	
	8.1.2	All reports (including Process Review Checklists and any Design Audits) shall be prepared and certified by the ET, verified by the IEC and approved by the Project Proponent.	Throughout the duration of construction works until construction is substantially completed. Throughout the duration of the operation.	ET IEC Project Proponent	
12.3	7.3	The Operator shall prepare and implement an Environmental Management Plan (EMP) to define mechanisms for achieving the environmental requirements specified in the EIA, EP and in statutory regulations.	Throughout the duration of the operation.	Operator	
Air Quality	,				
13.2		The Operator shall ensure that EcoPark "base case" assumptions for air quality shown in Table 13.1 of the Final EIA Report are met by tenants, as a whole.	Throughout the duration of the operation.	Operator	Table 13.1 of the Final EIA Report
Water Qua	lity				
5.4.11 & 5.6.7		To minimise the chance of accidental spillage during loading and unloading, and thereby reduce marine water quality impacts, well established cargo handling guidelines should be followed.	Adjacent to EcoPark marine frontage when loading or unloading goods.	Operator Operators of bulk carriers	Sections 5 & 6 of IMO Code of Practice for the Safe Loading/ Unloading of Bulk Carriers

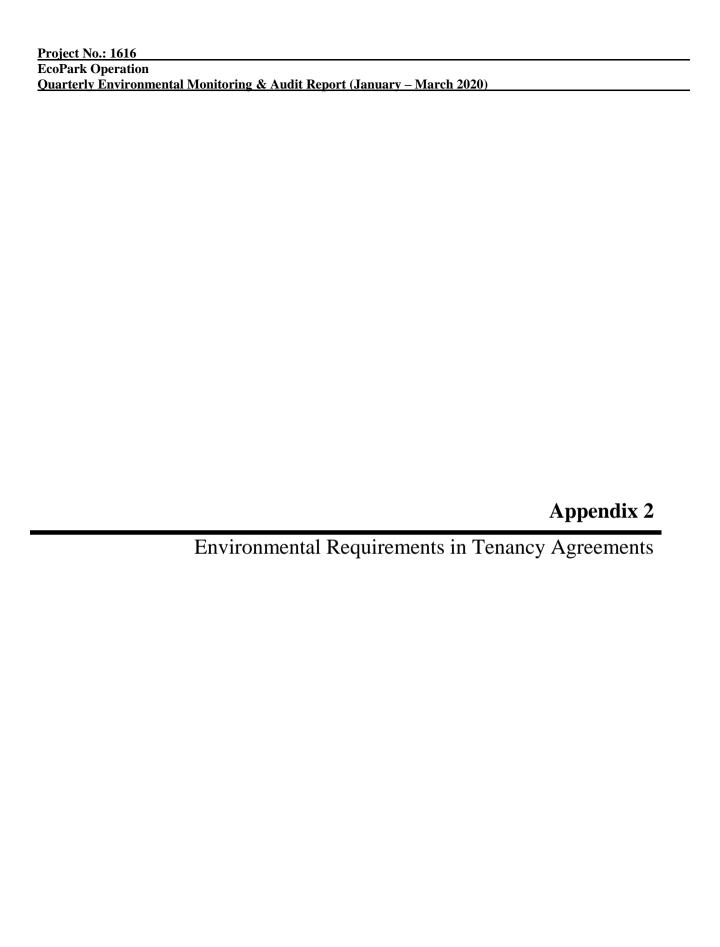

AEC Issue 1

EIA Ref.	EM&A Ref.	Environmental Protection Measures Identified in the Implementation Schedule that are Applicable to the Operation Phase of EcoPark	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Relevant Legislation and Guidelines
5.5.19		Contaminated water collected in the surface drainage systems shall be treated at the WTF or other appropriate treatment facility.	Within EcoPark throughout the life of the facility.	Operator	
5.5.23 to 5.5.25	4.2.5 to 4.2.7	An Emergency Response Plan (ERP) will be formulated to address various accident scenarios. The ERP will be certified by the Environmental Team (ET) and verified by the Independent Environmental Checker (IEC) under the operation EM&A programme.	Within EcoPark throughout the life of the facility.	Operator	
5.6.4		For uncovered areas where recovery process identified as causing potentially high level of contamination are located, stop-logs will be installed in the perimeter drainage system to isolate contamination.	Within EcoPark throughout the life of the facility.	Operator	
	4.2.2	The ET should develop an audit checklist, with the agreement of the IEC, to ensure that each mitigation measure is implemented when appropriate and operated correctly when implemented.	Within EcoPark throughout the life of the facility.	ET with IEC	
Waste Man	agement				
6.8.7	5.2.4	The Operator should register with EPD as a chemical waste producer.	Within EcoPark throughout the life of the facility.	Operator	Waste Disposal (Chemical Waste) (General) Regulation
6.8.16		The dust collected by any air pollution control equipment installed by tenants must be tested to ensure compliance for landfill disposal.	Within EcoPark throughout the life of the facility.	Operator	Practice Note for disposal of dusty waste at landfills & Admission Ticket System
6.8.18 & 6.8.22	5.2.4	Sludge will be disposed of at WENT landfill, or at any future dedicated sludge treatment facility. Sludge will be collected by a Licensed collector at regular intervals, as determined by the operation of the WTF.	Within EcoPark throughout the life of the facility.	Operator	

AEC Issue 1_

EIA Ref.	EM&A Ref.	Environmental Protection Measures Identified in the Implementation Schedule that are Applicable to the Operation Phase of EcoPark	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Relevant Legislation and Guidelines
6.8.21	5.2.4	Chemical wastes shall be stored in appropriate containers in a covered area. "No Smoking" signs will be clearly displayed to prevent accidental ignition of flammable materials. Drip trays capable of storing 110% of the volume of the largest container will be used to mitigate possible leakage.	Within EcoPark throughout the life of the facility.	Operator	Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes
	5.2.3 & 5.2.5	The ET should develop an audit checklist, with the agreement of the IEC, to ensure that each mitigation measure is implemented when appropriate and operated correctly when implemented.	Within EcoPark throughout the life of the facility.	ET with IEC	
6.8.7	5.2.4	The Operator should register with EPD as a chemical waste producer.	Within EcoPark throughout the life of the facility.	Operator	Waste Disposal (Chemical Waste) (General) Regulation
Prevention	of Contam	inated Land			
7.3.1	5.3.2	Any spillages of contaminating material shall be cleaned up immediately through the use of an absorbent. Any such used material should then be considered chemical waste and disposed of appropriately.	Within EcoPark throughout the life of the facility.	Operator	
7.3.3		Any areas within the lot to be used for recycling processes shall be concrete paved before recycling activities commence.	Within EcoPark throughout the life of the facility.	Operator	
7.3.5	5.3.2	During operation, the greatest risk of land contamination will come from storage of chemical wastes, therefore the measures should be followed:	Within EcoPark throughout the life of the facility.	Operator	
		 All chemical storage areas shall be provided with locks and be sited on sealed areas. The storage areas shall be surrounded by bunds with a capacity equal to 110% of the storage capacity of the largest tank to prevent spilled oil and chemicals from contaminating the ground. Chemical wastes will be collected, stored and disposed of in 			

EIA Ref.	EM&A Ref.	Environmental Protection Measures Identified in the Implementation Schedule that are Applicable to the Operation Phase of EcoPark	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Relevant Legislation and Guidelines
		accordance with the Regulation. Disposal of other construction waste will be undertaken by licensed contractors in accordance with applicable statutory requirements in the WDO.			
		Chemical wastes shall be handled according to the relevant code of practice. Spent chemicals shall be stored and collected by an approved operator for disposal at a licensed facility in accordance with the relevant regulation.			
Landfill Ga	is				
8.7.10 & 8.7.11	6.1.2	 Alert workers and visitors of possible LFG hazards Prohibit smoking and open fires on site Conduct regular (quarterly) LFG monitoring at mobile offices, equipment stores, etc. 	Within EcoPark throughout the life of the facility.	Operator	
	6.4.3	Following construction, routine monthly monitoring may be required at service voids and utility boxes. The monitoring requirement and specific locations of monitoring points shall be established based on the findings of the monitoring carried out during construction (i.e. if no LFG is detected during construction then no routine monitoring is required). The need for continued monitoring shall, however, be reviewed through discussion with EPD.	Within EcoPark throughout the life of the facility.	Operator	
Hazard to	Life				
10.4.3		Building height limit within EcoPark shall be applied to structures within which people may work at elevated levels.	Within EcoPark throughout the life of the facility.	Operator	EIA Report Table 10.2
Landscape	and Visua				
9.4.4		It recommended that this commonality be promoted throughout EcoPark by the Operator and adopted by tenants, if practicable.	Within EcoPark throughout the life of the facility.	Operator	

Compliance of Environmental Legislation

5. The Tenant shall comply with and observe all Ordinances, by-laws, regulations and rules for the time being in force in Hong Kong governing the control of any form of pollution, including air, noise, water and waste pollution, and for the protection of the environment.

Air Pollution

6. Save with an appropriate exemption under the Air Pollution Control Ordinance (Cap. 311) any regulations made thereunder and any amending legislation, the Tenant shall not install or permit or suffer to be installed upon the Premises or any part thereof or any building(s) or structure(s) or part of any building(s) or structure(s) erected or to be erected thereon any furnace, oven, chimney or flue or any other combustion equipment or use or permit or suffer to be used any fuel or any method or process of manufacture or treatment that might in any circumstance result in, cause or contribute to the discharge or emission of any pollutant or any noxious, harmful or corrosive matter, whether it be in the form of gas, smoke, liquid, solid or otherwise (including but not limited to air pollutant as defined in Section 2 of the Air Pollution Control Ordinance

(Cap. 311), which exists or which is imminent, without the prior written approval of the Director.

Water Pollution

- 7. (a) In the event that the Tenant produces, generates, permits, causes, allows or suffers any discharge which is subject to control under the Water Pollution Control Ordinance (Cap. 358) any regulations made thereunder and any amending legislation, the Tenant shall apply to the Director for a licence and comply with the terms and conditions stipulated in the licence at the Tenant's own cost(s). Otherwise, the Tenant is not allowed to discharge directly or indirectly or to produce, generate, permit, cause, allow or suffer any discharge into any public sewer, storm-water drain, channel, stream-course, sea or any area inside or outside the Premises any trade effluent or foul or contaminated water or cooling or hot water. Subject to the said licence from the Director, the Tenant shall at its own cost(s) separate, collect, and discharge all process or industrial wastewater which comply with the standard required for discharge into a sewer leading to the sewage treatment works at Pillar Point or other treatment works specified in the licence.
 - (b) Subject to obtaining advance written approval of the Director, the Tenant shall at its own cost(s) provide, install, operate and maintain its own waste water pretreatment plants within the Premises if such process or industrial wastewater could not meet the standard required for discharge into a sewer leading to the sewage treatment works at Pillar Point or other treatment works specified in the licence. The Tenant shall at its own cost(s) separate, collect, discharge and send all domestic wastewater (i.e. other than process or industrial wastewater) to the Pillar Point Sewage Treatment Works directly for treatment or other treatment works specified in the licence.
 - (c) In any event, the Tenant shall prevent any spilled materials from entering the surface water drainage system and prevent contamination of the sea at its own cost(s) by, inter alia, providing, installing, operating and maintaining stop-logs or interceptors in the surface water drainage system and at the marine frontage area, respectively, or as required by the licence. The Tenant shall at its own cost comply with relevant provisions of the Dumping at Sea Ordinance (Cap. 466) good practices and relevant provisions of the EIA Report and Final EM&A Manual.

Waste Management

- 8. (a) The Tenant shall at its own cost(s) comply with relevant provisions of the Waste Disposal Ordinance (Cap. 354).
 - (b) The Tenant shall not permit, allow or suffer any fuel or chemical and any sewage, waste water or effluent containing sand, cement, silt or any suspended or dissolved material to flow, escape or run from the Premises onto any adjoining land or allow any waste matter which does not form part of the recovery and/or recycling and/or reprocessing operation or is not part of the final product of such operation to be deposited, kept, held or stored anywhere within the Premises and other areas of EcoPark. The Tenant shall at its own cost(s) have all such matters and all materials arising from recycling activities, chemical materials arising from maintenance of plant and equipment, sewage sludge (from wastewater treatment facilities, if any) and general daily waste from the operation removed from the Premises or any building(s) or structure(s) or any part of any building(s) or structure(s) erected or to be erected thereon in a proper manner to the satisfaction of the Landlord and/or the Director.

Noise Pollution

- 9. (a) The Tenant shall take all necessary measures as may be required by and to the satisfaction of the Landlord and/or the Director to ensure that the operation of all plant and equipment, installed or used on the Premises or in any building(s) or structure(s) or any part of any building(s) or structure(s) erected or to be erected thereon, will not result, not cause and/or will not contribute any noise (which exists or which is imminent) which disturbs or annoys the residents or occupiers of any adjoining or neighbouring lot or lots or premises, or causes and/or contributes to disturbance to the general public under the Noise Control Ordinance (Cap. 400) any regulations made thereunder and any amending legislation.
 - (b) The decision of the Landlord or the Director as to whether any such plant and equipment are causing disturbance or annoyance as aforesaid shall be final and binding on the Tenant.

Landfill Gas Hazard

10. To mitigate landfill gas hazard, the Tenant shall at its own cost(s) comply with, inter alia, Condition 4.13 of the Environmental Permit No. EP-226/2005/A regarding raising clear of the ground all buildings and enclosed structures as specified in inter alia

Condition 3.7 (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate hazard to life impact).

EcoPark Being Within the 250m Consultation Zone of Siu Lang Shui Landfill

- 11. (a) The Tenant acknowledges that the EcoPark is within the 250m Consultation Zone of the Siu Lang Shui Landfill and that the Premises may be affected by problems associated with migrating landfill gas and undertakes to provide suitable precautionary or protection measures at his own expense to control these potential hazards.
 - (b) The Tenant shall ensure all personnel entering the Premises and all visitors to the Premises are aware of the potential hazards of the landfill gas by posting suitable warning notices of the potential hazards at his own expense.
 - (c) All buildings and enclosed structures, including temporary offices, temporary stores and the administration building, within the 250m Consultation Zone of the Siu Lang Shui Landfill shall be provided with the following measure(s):
 - (i) buildings shall be raised clear of the ground with a clear separation distance (as measured from the highest point on the ground surface to the underside of the lowest floor joist) of at least 500mm; or
 - (ii) a low-gas permeability membrane shall be applied to the surface of any wall or floor slab that rests on or is below ground. A gravel-fill vent system shall be provided such that passive venting is achieved around the perimeter of the structure. In addition, other building materials, such as dense well-compacted concrete or steel shuttering which provide a measure of resistance to gas permeation, shall be used to achieve gas protection.
 - (d) The Tenant shall ensure that the electrical equipment used on the Premises shall be intrinsically safe. Welding, flame-cutting or other hot works shall be confined to the open areas of the Premises and shall be at least 15m away from any ground-level confined space.
 - (e) No drilling, trenching and excavation shall be allowed on the Premises. During any construction work, the Tenant shall observe the guidelines recommended in Chapter 8 of the "Landfill Gas Hazard Assessment Guidance Note" published by the Department of Environmental Protection. In particular, no smoking, naked

flames and all other sources of ignition shall be allowed within 15m of any ground-level confined space.

Hazard to Life Impact

- 12. To mitigate hazard to life impact, the Tenant shall comply with, inter alia, Conditions 4.8 to 4.10 of the Environmental Permit No. EP-226/2005/A (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate hazard to life impact) and shall not:-
 - (a) bring, keep, store or transport chlorine within the Premises and other areas of EcoPark;
 - (b) bring, keep, store, locate or transport dangerous goods, substances and fuels supporting combustion including oxygen, acetylene, hydrogen peroxide, rubber tyres and diesel within 10 metres from the boundary of the site of EcoPark; and
 - (c) exceed the building height restrictions for buildings on the Premises which are on/near the western boundary of the site of EcoPark as mentioned in Annex B to the Environmental Permit No. EP-226/2005/A (including any updated Permit, amended permit and further permit).

Landscape and Visual Impacts

13. To mitigate landscape and visual impacts, the Tenant shall at its own cost(s) comply with, inter alia, Condition 4.14 of the Environmental Permit No. EP-226/2005/A regarding maintaining landscape, planting, treatment and mitigation measures as specified in inter alia Condition 3.8 and Figure 3 (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate landscape and visual impacts).

Environmental Permits Relating to EcoPark

14. The Tenant hereby declares, confirms and acknowledges that it is fully aware that, pursuant to the Environmental Impact Assessment Ordinance (Cap.499), the Director has the right to grant, amend or revoke environmental permit(s) or to grant further or amended environmental permit(s) relating to the lots comprising the EcoPark and any other lots but that such right may be challenged by third parties on justifiable grounds. The Tenant hereby undertakes to waive all its rights and remedies for any loss, damages, cost and expenses whatsoever which it may sustain and/or incur directly or

indirectly as a result of the grant, amendment or revocation of the environmental permit(s) or the consequential grant of further or amended environmental permit(s), including but not limited to any right to terminate this Lease and/or to make any claim against the Landlord and/or the Director for any compensation whatsoever.

Notes:

- 1) The throughput data presented in Tables A3.1-1 to A3.1-7 has been rounded off to the nearest whole tonne for presentation.
- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.
- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.
- 5) The presented throughput is the best available data.
- 6) "-" in the column of waste disposal denotes zero quantity; while "n/a" denotes unavailable information.

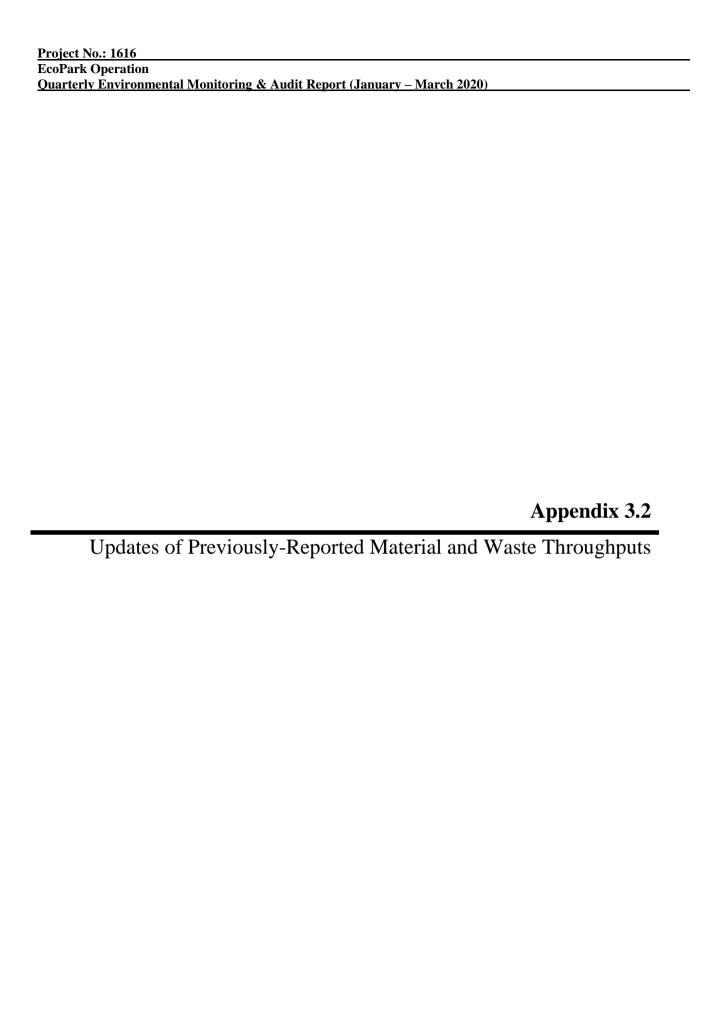

Table A3.2-1 Recycling of Waste Organic Food

Date	Waste Input (tonne)	Product Output (tonne)	Waste Disposal (tonne)

	e) Dangerous goods properly packaged?	

Remarks:

Follow-up from Previous Audits

A proper signage for the chemical waste storage area had been provided by the tenant.
 The chemical container without securely attacted chemical waste label was removed from the storage area.

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

(Observed on 16 Jan 2020)

(Observed on 23 Dec 2019)

General refuse was still observed in the perimeter drain next to the exhaust of carbon filter. The tenant should remove the refuse in order to prevent any blockage. The status will be reviewed in next inspection.

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

SITE INSPECTION CHECKLIST

3) Little milky oil discharge were still observed in the stormwater drain at the entrance area. The tenant was requested to remove the oil discharge. The tenant was also reminded to prevent any untreated runoff from discharging to the stormwater drain and to follow the discharge standard of the WPCO discharge licence. The status will be reviewed in next inspection.

(Observed on 16 Jan 2020)

(Observed on 23 Dec 2019)

4) No grease was observed in perimeter drain adjacent to filter press system. Nevertheless, the tenant should remove the grease on the floor and ensure the filtrate can be well collected in skips. In addition, the tenant was also reminded to provide sufficient measures, e.g. seal up the barriers with concrete, to prevent any potential surface runoff entering into the perimeter drain. The status will be reviewed in

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

(Observed on 16 Jan 2020)

5) Oil spillage adjacent to the chemical waste storage area owing to machinery repairment had been removed.

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

SITE INSPECTION CHECKLIST

6) Under the renewed discharge licence, bi-monthly sampling results complying with discharge limitations was provided by the tenant.

(Provided by tenant)

(Observed on 16 Jan 2020)

7) Oil spillage adjacent to the cooling tower had been cleaned up.

(Rectification work was conducted on 23 Dec 2019)

(Observed on 16 Jan 2020)

8) A portion of oil stain was still found at the vehicular access. The tenant was requested to clean up the stain. The status will be reviewed in next inspection.

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

SITE INSPECTION CHECKLIST

New Observation

1) Two dark oil stains were observed on the floor between toilet and blower area. The tenant should clean the stains off the floor by using absorbent material and dispose of as chemical waste. The status will be reviewed in next inspection.

(Observed on 16 Jan 2020)

Remarks:

Follow-up from Previous Audits

1) Little milky oil discharge were still observed in the stormwater drain at the entrance area. The tenant was requested to remove the oil discharge. The tenant was also reminded to prevent any untreated runoff from discharging to the stormwater drain and to follow the discharge standard of the WPCO discharge licence. The status will be reviewed in next inspection.

(Observed on 16 Jan 2020)

(Observed on 18 Feb 2020)

2) General refuse had been cleared from the perimeter drain next to the exhaust of carbon filter.

(Observed on 16 Jan 2020)

(Observed on 18 Feb 2020)

SITE INSPECTION CHECKLIST

3) As no grease was observed in perimeter drain adjacent to filter press system during regular site inspections between November 2019 and February 2020, it is considered that the current measures, such as concrete barriers and regular waste removal, are sufficient to prevent oil product from entering into perimeter drain. The tenant is also reminded to inspect the conditions of perimeter drain regularly to ensure no direct discharge of oil product into stormwater system

(Observed on 16 Jan 2020)

(Observed on 18 Feb 2020)

(Observed on 18 Feb 2020)

4) A portion of oil stain was still found at the vehicular access. The tenant was requested to clean up the stain.

(Observed on 16 Jan 2020)

(Observed on 18 Feb 2020)

5) Two dark oil stains observed on the floor between toilet and blower area was removed.

(Observed on 18 Feb 2020)

New Observation

• No major environmental deficiency was observed.

	Condition: ✓ Sunny Fine Overcast Drizzle	Rain Storm Hazy
	Temperature: 20 °C Humidity: ✓ High	Moderate Low
	Wind: Calm Light Breeze Strong	
<u>1. Ge</u>	<u>eneral</u>	N/A Yes No Remarks
1.1	Environmental Permit (EP) for Tenant displayed at entrances/exits?	EP for tenant is not required UPML's Environmental Policy is
1.2	Environmental Policy documented?	followed
1.3	Environmental Management Plan (EMP) kept up-to-date?	✓ UPML's EMP is followed
1.4	Emergency Response Plan (ERP) documented?	✓ UPML's ERP is followed
1.5	All recycling processes in operation have been approved by WRG of EPD?	
1.6	Any record of complaint or prosecution?	
2. W	ater Quality	N/A Yes No Remarks No wastewater is generated from the
2.1	Valid Effluent Discharge Licence available?	recycling process
	a) Sampling record available?	
	b) Monitoring frequency met the licence requirement?	
	c) Monitoring result comply with the licence requirement?	
	d) If exceedance is recorded, any follow-up action taken?	
2.2	Provision of wastewater treatment facility (WTF) prior to discharge?	
	a) Adequate capacity?	
	b) Properly maintained and function normally?	
2.3	Surface run-off control measures in place and adequately maintained?	
2.4	Surface run-off discharging into drainage system?	
2.5	All manholes covered?	
2.6	Foam, oil, grease, debris, rubbish and other objectionable matters prevented from entering nearby drains or sewer?	
2.7	Storage of materials and equipment located away from water bodies?	
2.8	Drainage system well maintained to prevent flooding or overflow?	Recycling process has low risk of
2.9	Processes or activities with high risk of contamination located under covered area?	contamination Stop-logs are available for use by tenant
2.10	Installation of stop-logs in perimeter drainage system for uncovered areas where recovery process with potentially high level of contamination is carried out?	Stop-logs are available for use by tenant if needed.
2.11	Equipment oil and lubrication replacements performed only in bunded maintenance area?	Replacement activity is not observed
2.12	Contaminated water collected in the surface drainage system is treated at water treatment facility or other appropriate treatment facility?	No contaminated water is observed

2.13	Drainage from maintenance area discharged via oil interceptor?	✓			Not required
	a) Oil and grease removed regularly?	✓			
	b) Collected by licensed collector?	✓			
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	√			Not required
2.15	Bulk cargo and materials packed properly?		√		
2.16	Temporary stockpiles covered during rainstorms?	✓			No rainstorm during inspection
2.17	Measures to prevent the washing away of sand/silt to drains?	√			No sand/silt is generated from the recycling process
3. Aiı	· Quality	N/A	Yes	No	Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?	√			Not required
	a) SP Licence conditions / monitoring requirements comply?	✓			
3.2	Operate without generation of noticeable odour?	✓			No operation is observed during inspection
	a) If odour is detected, can the source be identified?	√			
	b) Odourous materials covered?	✓			
	c) If odour control system is installed, is it operating normally?	√			
3.3	Dusty materials dampened prior to loading/unloading?	√			Dampening of waste wood affects the wood quality and is therefore unsuitable
3.4	Dust monitoring record available?	✓			Not required
	a) Monitoring frequency met the licence requirement?	✓			
	b) Any exceedance?	√			
	c) If exceedance is recorded, follow-up action taken?	√			
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e. enclosures or regular dampening)?	✓			Dust-generating activity is not observed
3.6	Open burning prohibited?		√		No constitute of alcost in alcost of decision
3.7	Emission from chimney or powered plant free of black smoke?	√			No operation of plant is observed during inspection
3.8	Vehicles and equipment switched off while not in use?		√		
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	✓			Not required
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	✓			Not required
3.11	Air pollution control system properly maintained and function normally?	✓			Dust-generating activity is not observed.
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?	√			
	a) Obtained approval for the use of controlled refrigerant?	√			
	b) If yes, record of refrigeration equipment service available?	✓			
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?	✓			
3.14	Public road around site entrance kept clean and free from dust?		✓		
3.15	Materials transported on trucks covered?	√			Not observed

3.16	Truck loads to a level within the side and tail boards?		✓			Not observed
3.17	Stockpiles of dusty materials covered or regularly watered?		✓			Dampening of waste wood affects the wood quality and is therefore unsuitable
3.18	Major dust source(s): Wind erosion	Veh	icle/equ	ıipmen	t move	ement

2. W	ater Quality	N/A Yes No Rema	arks stewater is generated from recycling
2.1	Valid Effluent Discharge Licence available? a) Sampling record available? b) Monitoring frequency met the licence requirement? c) Monitoring result comply with the licence requirement? d) If exceedance is recorded, any follow-up action taken?	✓	
2.2	Provision of wastewater treatment facility (WTF) prior to discharge? a) Adequate capacity? b) Properly maintained and function normally?		
2.3	Surface run-off control measures in place and adequately maintained?		_
2.4	Surface run-off discharging into drainage system? All manholes covered?		
	Foam, oil, grease, debris, rubbish and other objectionable matters prevented from entering nearby drains or sewer?		
2.7	Storage of materials and equipment located away from water bodies?		
2.8	Drainage system well maintained to prevent flooding or overflow?	☐ ✓ ☐ Bowe	ling process has law risk of
2.9	Processes or activities with high risk of contamination located under covered area?	✓ contain	ling process has low risk of nination
2.10	Installation of stop-logs in perimeter drainage system for uncovered areas where recovery process with potentially high level of contamination is carried out?	Stop-le needed	ogs are available for use by tenant if l.
2.11	Equipment oil and lubrication replacements performed only in bunded maintenance area?	✓ Replac	ement activity is not observed
2.12	Contaminated water collected in the surface drainage system is treated at water treatment facility or other appropriate treatment facility?	No con	ntaminated water is observed

2.13	Drainage from maintenance area discharged via oil interceptor?	✓		Not required
	a) Oil and grease removed regularly?	√		
	b) Collected by licensed collector?	✓		
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	/		Not required
2.15	Bulk cargo and materials packed properly?			
2.16	Temporary stockpiles covered during rainstorms?	✓		No dusty stockpile is observed No sand/silt is generated from the recycling
2.17	Measures to prevent the washing away of sand/silt to drains?	✓		process
3. Aiı	· Quality	N/A Yes	No	Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?	✓		Not required
	a) SP Licence conditions / monitoring requirements comply?	✓		
3.2	Operate without generation of noticeable odour?	√		No operation is observed during inspection
	a) If odour is detected, can the source be identified?	√		
	b) Odourous materials covered?	✓		
	c) If odour control system is installed, is it operating normally?	✓		N. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1.
3.3	Dusty materials dampened prior to loading/unloading?	√		No loading/unloading of dusty materials is observed
3.4	Dust monitoring record available?	✓		Not required
	a) Monitoring frequency met the licence requirement?	✓		
	b) Any exceedance?	√		
	c) If exceedance is recorded, follow-up action taken?	√		
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e. enclosures or regular dampening)?	/		Dust-generating activity is not observed
3.6	Open burning prohibited?			
3.7	Emission from chimney or powered plant free of black smoke?	✓		No operation is observed during inspection
3.8	Vehicles and equipment switched off while not in use?			
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	✓ □		Not required
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	✓ [Not required
3.11	Air pollution control system properly maintained and function normally?	√		
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?	✓ [
	a) Obtained approval for the use of controlled refrigerant?	✓		
	b) If yes, record of refrigeration equipment service available?	/ [
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?	/		
3.14	Public road around site entrance kept clean and free from dust?			
3.15	Materials transported on trucks covered?	V		Not observed

3.16 Truck loads to a level within the side and tail boards?		✓ Not observed
3.17 Stockpiles of dusty materials covered or regularly watered?		✓ No stockpile of dusty material is observed
3.18 Major dust source	e(s): Wind erosion	Vehicle/equipment movement

Remarks:

Follow-up from Previous Audits

Truck loaded to a level within the side and tail boards was observed. Nevertheless, materials transported on truck should be properly covered. The status will be reviewed in next inspection.

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

New Observation

No major environmental deficiency was observed.

Remarks:

Follow-up from Previous Audits

1) No trucks with improper cover was observed during the inspection.

(Observed on 16 Jan 2020)

(Observed on 18 Feb 2020)

New Observation

1) Smoke and dust emission has been seen during the operation of the site. The tenant is reminded to implement dust-suppression measures to reduce dust emission.

(Observed on 18 Feb 2020)

SITE INSPECTION CHECKLIST

4. Waste / Chemical Management

Gene	<u>ral</u>	N/A	Yes	No	Remarks
4.1	Registered as chemical waste producer?		✓		
4.2	Sufficient receptacles (e.g. rubbish bins) available?		✓		
4.3	Disposed of regularly and properly?		✓		
4.4	Sorting of materials on-site for reuse or disposal to designated outlet?		✓		
4.5	Records of quantities of waste generated, recycled and disposed properly kept?		✓		Verified via quarterly report
4.6	Collection of sludge by licensed collector at regular intervals?	✓			
Pack	aging of Chemical Waste				
4.7	Stored in suitable container?		✓		
4.8	Container properly closed or sealed?		✓		
4.9	Spillage cleaned up immediately through the use of absorbent?	✓			
4.10	Obtained approval for the use of chemical waste container >450L?	✓			
Labe	lling of Chemical Waste				
4.11	Provision of chemical waste label?		✓		Follow-up Observation (2)
	a) Label is securely attached and visible?		✓		Follow-up Observation (2)
	b) Label is bilingual and in proper dimension?		✓		Follow-up Observation (2)
	c) Information is accurate and sufficient?		✓		Follow-up Observation (2)
Stora	ge of Chemical Waste				
4.12	Proper "Chemical Waste" sign displayed?		✓		
4.13	Incompatible wastes separated by impermeable partition?	✓			Not observed
4.14	Containers kept in cabinet or receptacle of suitable material (if quantity $<50L$), or provided with drip trays capable of storing 110% of the volume of the largest container (if quantity $>$		✓		
4.15	Enclosed on 3 sides with no less than 2m in height or height of tallest container / stack of containers?		✓		
4.16	Properly stored and locked in designated area with adequate ventilation?		✓		
4.17	Storage area paved with concrete and kept clean and dry?		✓		
4.18	Cover provided for outdoor storage area?		✓		
4.19	Chemical waste collected by licensed collector?	✓			Not observed
Liqui	id Waste Storage				
4.20	Storage area provided with permeation-proof floor or surface?		√		
4.21	Capacity of retention structure sufficient to accommodate contents of the largest container or 20% volume of the material in storage?		✓		
4.22	Walls or partitions of stacked container storage area constructed of impermeable material?		✓		
5. La	andfill Gas (LFG) (within LFG Consultation Zone)	N/A	Yes	No	Remarks
5.1	Alert workers and visitors of possible LFG hazards?	√			Outside LFG consultation zone
5.2	Smoking and open fires prohibited?		√		

SITE INSPECTION CHECKLIST

6. U	<u>mers</u>	N/A	Yes	No	Remarks
6.1	Works confined within lot boundaries?		✓		
6.2	Damage to surrounding areas avoided?		✓		
6.3	Site lighting designed to avoid glare to surrounding receivers?	✓			
6.4	Materials and machinery stored in an orderly manner?		✓		
6.5	Areas within lot for recycling activities paved with concrete?		✓		
6.6	Potential stagnant pools cleared and mosquito breeding prevented?		✓		
6.7	Valid calibration certificate for any monitoring equipment?	✓			Not provided
6.8	Valid licence(s) obtained for manufacture or storage of dangerous goods?	✓			Not required
	a) Storage area in compliance with the approved plan?	✓			
	b) Storage area is securely locked?	✓			
	c) Total storage capacity in compliance with relevant statutory requirement?	✓			
	d) Proper labelling provided?	✓			
	e) Dangerous goods properly packaged?	✓			

Remarks:

Follow-up from Previous Audits

1) Although part of open stockpiles were observed with covering of tarpaulin sheeting, the tenant was reminded to properly cover the stockpiles when they were not-in-use and regularly inspect the stormwater channel in order to prevent accumulation of grit and blockage in the stormwater channel. The status will be reviewed in next inspection.

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

2) Chemical waste containers stored in the chemical waste storage area were provided with chemical waste labels.

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

SITE INSPECTION CHECKLIST

Chemical containers above the perimeter drain near the site entrance had been removed.

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

New Observation

• No major environmental deficiency was observed.

	a) Storage area in compliance with the approved plan?	√			
	b) Storage area is securely locked?	✓			
	c) Total storage capacity in compliance with relevant statutory requirement?	✓			
	d) Proper labelling provided?	✓			
	e) Dangerous goods properly packaged?	✓			

Remarks:

Follow-up from Previous Audits

Open stockpiles were observed without covering of tarpaulin sheeting. The tenant was reminded to properly cover
the stockpiles when they were not-in-use and regularly inspect the stormwater channel in order to prevent accumulation of grit and
blockage in the stormwater channel. The status will be reviewed in the next inspection.

(Observed on 16 Jan 2020)

(Observed on 18 Feb 2020)

New Observation

· No major environmental deficiency was observed.

4. Waste / Chemical Management

Gene	<u>ral</u>	N/A	Yes	No	Remarks
4.1	Registered as chemical waste producer?		✓		
4.2	Sufficient receptacles (e.g. rubbish bins) available?		✓		
4.3	Disposed of regularly and properly?		✓		
4.4	Sorting of materials on-site for reuse or disposal to designated outlet?		✓		
4.5	Records of quantities of waste generated, recycled and disposed properly kept?		√		Verified via quarterly report
4.6	Collection of sludge by licensed collector at regular intervals?	✓			
Pack	aging of Chemical Waste				
4.7	Stored in suitable container?		✓		
4.8	Container properly closed or sealed?		✓		
4.9	Spillage cleaned up immediately through the use of absorbent?	✓			
4.10	Obtained approval for the use of chemical waste container >450L?	✓			
Labe	lling of Chemical Waste				
4.11	Provision of chemical waste label?		✓		
	a) Label is securely attached and visible?		✓		
	b) Label is bilingual and in proper dimension?		✓		
	c) Information is accurate and sufficient?		✓		
<u>Stora</u>	ge of Chemical Waste				
4.12	Proper "Chemical Waste" sign displayed?		✓		
4.13	Incompatible wastes separated by impermeable partition?	✓			Not observed
4.14	Containers kept in cabinet or receptacle of suitable material (if quantity $<$ 50L), or provided with drip trays capable of storing 110% of the volume of the largest container (if quantity $>$		✓		
4.15	Enclosed on 3 sides with no less than 2m in height or height of tallest container / stack of containers?		✓		
4.16	Properly stored and locked in designated area with adequate ventilation?		✓		
4.17	Storage area paved with concrete and kept clean and dry?		✓		
4.18	Cover provided for outdoor storage area?		✓		
4.19	Chemical waste collected by licensed collector?	✓			Not observed
<u>Liqui</u>	id Waste Storage				
4.20	Storage area provided with permeation-proof floor or surface?		✓		
4.21	Capacity of retention structure sufficient to accommodate contents of the largest container or 20% volume of the material in storage?		✓		
4.22	Walls or partitions of stacked container storage area constructed of impermeable material?		✓		
5. La	andfill Gas (LFG) (within LFG Consultation Zone)	N/A	Yes	No	Remarks
5.1	Alert workers and visitors of possible LFG hazards?	✓			Outside LFG consultation zone
5.2	Smoking and open fires prohibited?		√		

SITE INSPECTION CHECKLIST

<u>6. Others</u>		N/A	Yes	No	Remarks
6.1	Works confined within lot boundaries?		✓		
6.2	Damage to surrounding areas avoided?		√		
6.3	Site lighting designed to avoid glare to surrounding receivers?	✓			
6.4	Materials and machinery stored in an orderly manner?		✓		
6.5	Areas within lot for recycling activities paved with concrete?		√		
6.6	Potential stagnant pools cleared and mosquito breeding prevented?		✓		
6.7	Valid calibration certificate for any monitoring equipment?	\checkmark			Not provided
6.8	Valid licence(s) obtained for manufacture or storage of dangerous goods?	✓			Not required
	a) Storage area in compliance with the approved plan?	√			
	b) Storage area is securely locked?	✓			
	c) Total storage capacity in compliance with relevant statutory requirement?	✓			
	d) Proper labelling provided?	\checkmark			
	e) Dangerous goods properly packaged?	\checkmark			

Remarks:

Follow-up from Previous Audits

1) The remaining stockpiles were sufficiently watered during inspection.

(Observed on 18 Feb 2020)

(Observed on 19 Mar 2020)

New Observation

No major environmental deficiency was observed.

1. Ge	neral	N/A Yes No	Remarks
1.1	Environmental Permit (EP) for Tenant displayed at entrances/exits?		EP for tenant is not required.
1.2	Environmental Policy documented?		UPML's Environmental Policy is followed
1.3	Environmental Management Plan (EMP) kept up-to-date?		UPML's EMP is followed
1.4	Emergency Response Plan (ERP) documented?		UPML's ERP is followed
1.5	All recycling processes in operation have been approved by WRG of EPD?		
1.6	Any record of complaint or prosecution?		
-			
2. Wa	ater Quality	N/A Yes No	Remarks
2.1	Valid Effluent Discharge Licence available?	✓	Wastewater is tanked away
	a) Sampling record available?	/	
	b) Monitoring frequency met the licence requirement?	/	
	c) Monitoring result comply with the licence requirement?		
	d) If exceedance is recorded, any follow-up action taken?	✓	
2.2	Provision of wastewater treatment facility (WTF) prior to discharge?		Wastewater is tanked away
	a) Adequate capacity?		Storage in the underground storage tank
	b) Properly maintained and function normally?		Wastewater is tanked away
2.3	Surface run-off control measures in place and adequately maintained?		
2.4	Surface run-off discharging into drainage system?		Manholes near the cleaning area are
2.5	All manholes covered?		sealed Follow-up Observation (1) &
2.6	Foam, oil, grease, debris, rubbish and other objectionable matters prevented from entering nearby drains or sewer?		Follow-up Observation (2)
2.7	Storage of materials and equipment located away from water bodies?		
2.8	Drainage system well maintained to prevent flooding or overflow?		
2.9	Processes or activities with high risk of contamination located under covered area?		Stop-logs are available for use by
2.10	Installation of stop-logs in perimeter drainage system for uncovered areas where recovery process with potentially high level of contamination is carried out?	V	tenant if needed.
2.11	Equipment oil and lubrication replacements performed only in bunded maintenance area?		Replacement activity is not observed
2.12	Contaminated water collected in the surface drainage system is treated at water treatment facility or other appropriate treatment facility?	✓ □ □	Wastewater is tanked away

2.13	Drainage from maintenance area discharged via oil interceptor?		Wastewater is tanked away
	a) Oil and grease removed regularly?	✓	
	b) Collected by licensed collector?	/	
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	Y	Not required
2.15	Bulk cargo and materials packed properly?	/	Not required
2.16	Temporary stockpiles covered during rainstorms?	/	Na and delta in a second of formation
2.17	Measures to prevent the washing away of sand/silt to drains?		No sand/silt is generated from the recycling process
3. Air	Quality	N/A Yes No	Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?		
	a) SP Licence conditions / monitoring requirements comply?	/	No operation is observed during
3.2	Operate without generation of noticeable odour?	/	inspection
	a) If odour is detected, can the source be identified?		
	b) Odourous materials covered?	/	
	c) If odour control system is installed, is it operating normally?		
3.3	Dusty materials dampened prior to loading/unloading?		Dusty material is not observed
3.4	Dust monitoring record available?		Not required
	a) Monitoring frequency met the licence requirement?		
	b) Any exceedance?	/	
	c) If exceedance is recorded, follow-up action taken?	/	
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e. enclosures or regular dampening)?	Y	Dust-generating activity is not observed
3.6	Open burning prohibited?		N C L C L
3.7	Emission from chimney or powered plant free of black smoke?	/	No operation of plant is observed during inspection
3.8	Vehicles and equipment switched off while not in use?		
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	Y	
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	✓ □ □	
3.11	Air pollution control system properly maintained and function normally?	✓	
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?	✓	
	a) Obtained approval for the use of controlled refrigerant?	/	
	b) If yes, record of refrigeration equipment service available?		
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?

Remarks:

Follow-up from Previous Audits

1) Milky discharge and oil mixture was still observed in the stormwater drain. The tenant should remove the dusty discharge and prevent any untreated runoff from entering the stormwater manhole. The status will be reviewed in next inspection.

(Observed on 19 Nov 2019)

(Observed on 16 Jan 2020)

SITE INSPECTION CHECKLIST

2) Scum was still observed in the perimeter drain. The tenant should regularly inspect and clean up the scum. The status will be reviewed in next inspection.

(Observed on 16 Jan 2020)

New Observation

· No major environmental deficiency was observed.

1.1	Environmental Permit (EP) for Tenant displayed at entrances/exits?	✓			EP for tenant is not required.
1.2	Environmental Policy documented?	√			UPML's Environmental Policy is followed
1.3	Environmental Management Plan (EMP) kept up-to-date?	V			UPML's EMP is followed
1.4	Emergency Response Plan (ERP) documented?	✓			UPML's ERP is followed
1.5	All recycling processes in operation have been approved by WRG of EPD?		✓		
1.6	Any record of complaint or prosecution?			√	
2. Wate	r Quality	N/A	Yes	No	Remarks
2.1	Valid Effluent Discharge Licence available?	✓			Wastewater is tanked away
	a) Sampling record available?				
	b) Monitoring frequency met the licence requirement?				
	c) Monitoring result comply with the licence requirement?				
	d) If exceedance is recorded, any follow-up action taken?		一	一	
2.2	Provision of wastewater treatment facility (WTF) prior to discharge?	一	一		Wastewater is tanked away
	a) Adequate capacity?		✓		Storage in the underground storage tank
	b) Properly maintained and function normally?		一	一	Wastewater is tanked away
2.3	Surface run-off control measures in place and adequately maintained?		✓		
2.4	Surface run-off discharging into drainage system?		<u> </u>		
2.5	All manholes covered?	一一	<u> </u>	一	Manholes near the cleaning area are sealed
2.6	Foam, oil, grease, debris, rubbish and other objectionable matters prevented from entering nearby drains or sewer?		✓		Follow-up Observation (1) & Follow-up Observation (2)
2.7	Storage of materials and equipment located away from water bodies?		✓		-
2.8	Drainage system well maintained to prevent flooding or overflow?		✓		
2.9	Processes or activities with high risk of contamination located under covered area?		✓		-
2.10	Installation of stop-logs in perimeter drainage system for uncovered areas where recovery process with potentially high level of contamination is carried out?	✓			Stop-logs are available for use by tenant if needed.
2.11	Equipment oil and lubrication replacements performed only in bunded maintenance area?	✓			Replacement activity is not observed
2.12	Contaminated water collected in the surface drainage system is treated at water treatment facility or other appropriate treatment facility?	✓			Wastewater is tanked away
2.13	Drainage from maintenance area discharged via oil interceptor?	\checkmark			Wastewater is tanked away
	a) Oil and grease removed regularly?	✓			
	b) Collected by licensed collector?	✓			
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	✓			Not required
2.15	Bulk cargo and materials packed properly?	\checkmark			Not required
2.16	Temporary stockpiles covered during rainstorms?	\checkmark			
2.17	Measures to prevent the washing away of sand/silt to drains?	✓			No sand/silt is generated from the recycling process
3. Air O	nality	N/A	Yes	No	Remarks

3.1	Valid Specified Process (SP) Licence available for all specified process?	✓			
	a) SP Licence conditions / monitoring requirements comply?	✓			
3.2	Operate without generation of noticeable odour?	✓			No operation is observed during inspection
	a) If odour is detected, can the source be identified?				
	b) Odourous materials covered?		一		
	c) If odour control system is installed, is it operating normally?				
3.3	Dusty materials dampened prior to loading/unloading?				Dusty material is not observed
3.4	Dust monitoring record available?				Not required
	a) Monitoring frequency met the licence requirement?				
	b) Any exceedance?				
	c) If exceedance is recorded, follow-up action taken?				
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e.		\equiv		Dust-generating activity is not observed
3.3	enclosures or regular dampening)?	ب ا		<u> </u>	Bust generating activity is not observed
3.6	Open burning prohibited?		√		
3.7	Emission from chimney or powered plant free of black smoke?	√			No operation of plant is observed during inspection
3.8	Vehicles and equipment switched off while not in use?		✓		
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	✓			
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	✓			
3.11	Air pollution control system properly maintained and function normally?	√			
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?	√			
	a) Obtained approval for the use of controlled refrigerant?	✓			
	b) If yes, record of refrigeration equipment service available?	✓			
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?	✓			
3.14	Public road around site entrance kept clean and free from dust?	一	✓		
3.15	Materials transported on trucks covered?		一		Not observed
3.16	Truck loads to a level within the side and tail boards?	✓			Not observed

SITE INSPECTION CHECKLIST

Remarks:

Follow-up from Previous Audits

Milky discharge and oil mixture in the stormwater drain has been removed.

(Observed on 16 Jan 2020)

2) Scum in the perimetre basin has been removed.

(Observed on 16 Jan 2020)

(Observed on 18 Feb 2020)

(Observed on 18 Feb 2020)

New Observation

No major environmental deficiency was observed.

SITE INSPECTION CHECKLIST

6.1	Works confined within lot boundaries?	
6.2	Damage to surrounding areas avoided?	
6.3	Site lighting designed to avoid glare to surrounding receivers?	
6.4	Materials and machinery stored in an orderly manner?	
6.5	Areas within lot for recycling activities paved with concrete?	
6.6	Potential stagnant pools cleared and mosquito breeding prevented?	
6.7	Valid calibration certificate for any monitoring equipment?	Not required
6.8	Valid licence(s) obtained for manufacture or storage of dangerous goods?	Not required
	a) Storage area in compliance with the approved plan?	
	b) Storage area is securely locked?	
	c) Total storage capacity in compliance with relevant statutory requirement?	
	d) Proper labelling provided?	
	e) Dangerous goods properly packaged?	

Remarks:

Follow-up from Previous Audits

1) Proper signage of chemical waste storage areas was provided.

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

New Observation

· No major environmental deficiency was observed.

6.8	Valid licence(s) obtained for manufacture or storage of dangerous goods?		✓		
	a) Storage area in compliance with the approved plan?	✓			
	b) Storage area is securely locked?		✓		
	c) Total storage capacity in compliance with relevant statutory requirement?	✓			
	d) Proper labelling provided?		✓		
	e) Dangerous goods properly packaged?	✓			

Remarks:

Follow-up from Previous Audits

1) Chemical waste containers stored in chemical waste storage areas had been provided with chemical waste labels.

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

New Observation

No major environmental deficiency was observed.

4.20 Storage area provided	with permeation-proof floor or surface?	[✓			
	structure sufficient to accommodate contents of the 0% volume of the material in storage?	[✓			

SITE INSPECTION CHECKLIST

4.22	Walls or partitions of stacked container storage area constructed of impermeable material?	
<u>5. La</u>	andfill Gas (LFG) (within LFG Consultation Zone)	N/A Yes No Remarks
5.1	Alert workers and visitors of possible LFG hazards?	
5.2	Smoking and open fires prohibited?	
<u>6. Ot</u>	<u>hers</u>	N/A Yes No Remarks
6.1	Works confined within lot boundaries?	
6.2	Damage to surrounding areas avoided?	
6.3	Site lighting designed to avoid glare to surrounding receivers?	
6.4	Materials and machinery stored in an orderly manner?	
6.5	Areas within lot for recycling activities paved with concrete?	
6.6	Potential stagnant pools cleared and mosquito breeding prevented?	
6.7	Valid calibration certificate for any monitoring equipment?	✓ Not required
6.8	Valid licence(s) obtained for manufacture or storage of dangerous goods?	✓ Not required
	a) Storage area in compliance with the approved plan?	
	b) Storage area is securely locked?	
	c) Total storage capacity in compliance with relevant statutory requirement?	
	d) Proper labelling provided?	
	e) Dangerous goods properly packaged?	

Remarks:

Follow-up from Previous Audits

1) Dusty stockpile on the ground was entirely covered with impervious sheeting.

(Observed on 23 Dec 2019)

(Observed on 16 Jan 2020)

SITE INSPECTION CHECKLIST

New Observation

· No major environmental deficiency was observed.
